Narrative:

I went to visit the site to oversee the morning measuring and gauging event that is performed on the pre-determine residential potable wells. I arrived at [REDACTED] at 9:01am, GES was already onsite gauging the well. I was informed that they were now to sample the LNAPL in any well that they measured it in.

<u>Address</u>	<u>PID (ppm)</u>	<u>Petroleum Odor?</u>	<u>DTP (ft.)</u>	<u>DPW (ft.)</u>	<u>LNAPL thickness (ft.)</u>

[REDACTED]	17.8	No	32.53	32.53	0
[REDACTED]	4.3	No	41.80	41.80	0

DTP – Depth to product (LNAPL)

DPW – Depth to water

Observations from wells that were gauged:

[REDACTED] The LNAPL was bailed until it measured 0.01ft. The LNAPL was sampled to be analyzed.

[REDACTED] A sorbent sock was already in the potable well when the depth to water was measured. When the sock was checked, there was no odor or evidence of any product on it.

Narrative (continued):

[REDACTED] There was an absorbent sock in the well, the water level was gauged with it still in the well. The sock was pulled up to determine if there was any evidence of LNAPL. There was none, but the sock was not that wet. It appeared not to have been crossing the water table. Additional string was added so it would cross the water table.

[REDACTED] The sock in the well was removed to be inspected after it was gauged. There was a small petroleum odor. The sock was removed and placed in an amber bottle to go and be analyzed for any impact.

[REDACTED]: The resident was present observing the gauging activities.

I drove around the Mt. Eyre neighborhood before I left to go to the ET trailer to see if anyone was there. I noticed that there was GES sampling team at [REDACTED] and [REDACTED]. There was a vehicle from RETTEW and CTEH that were with the sampling team.

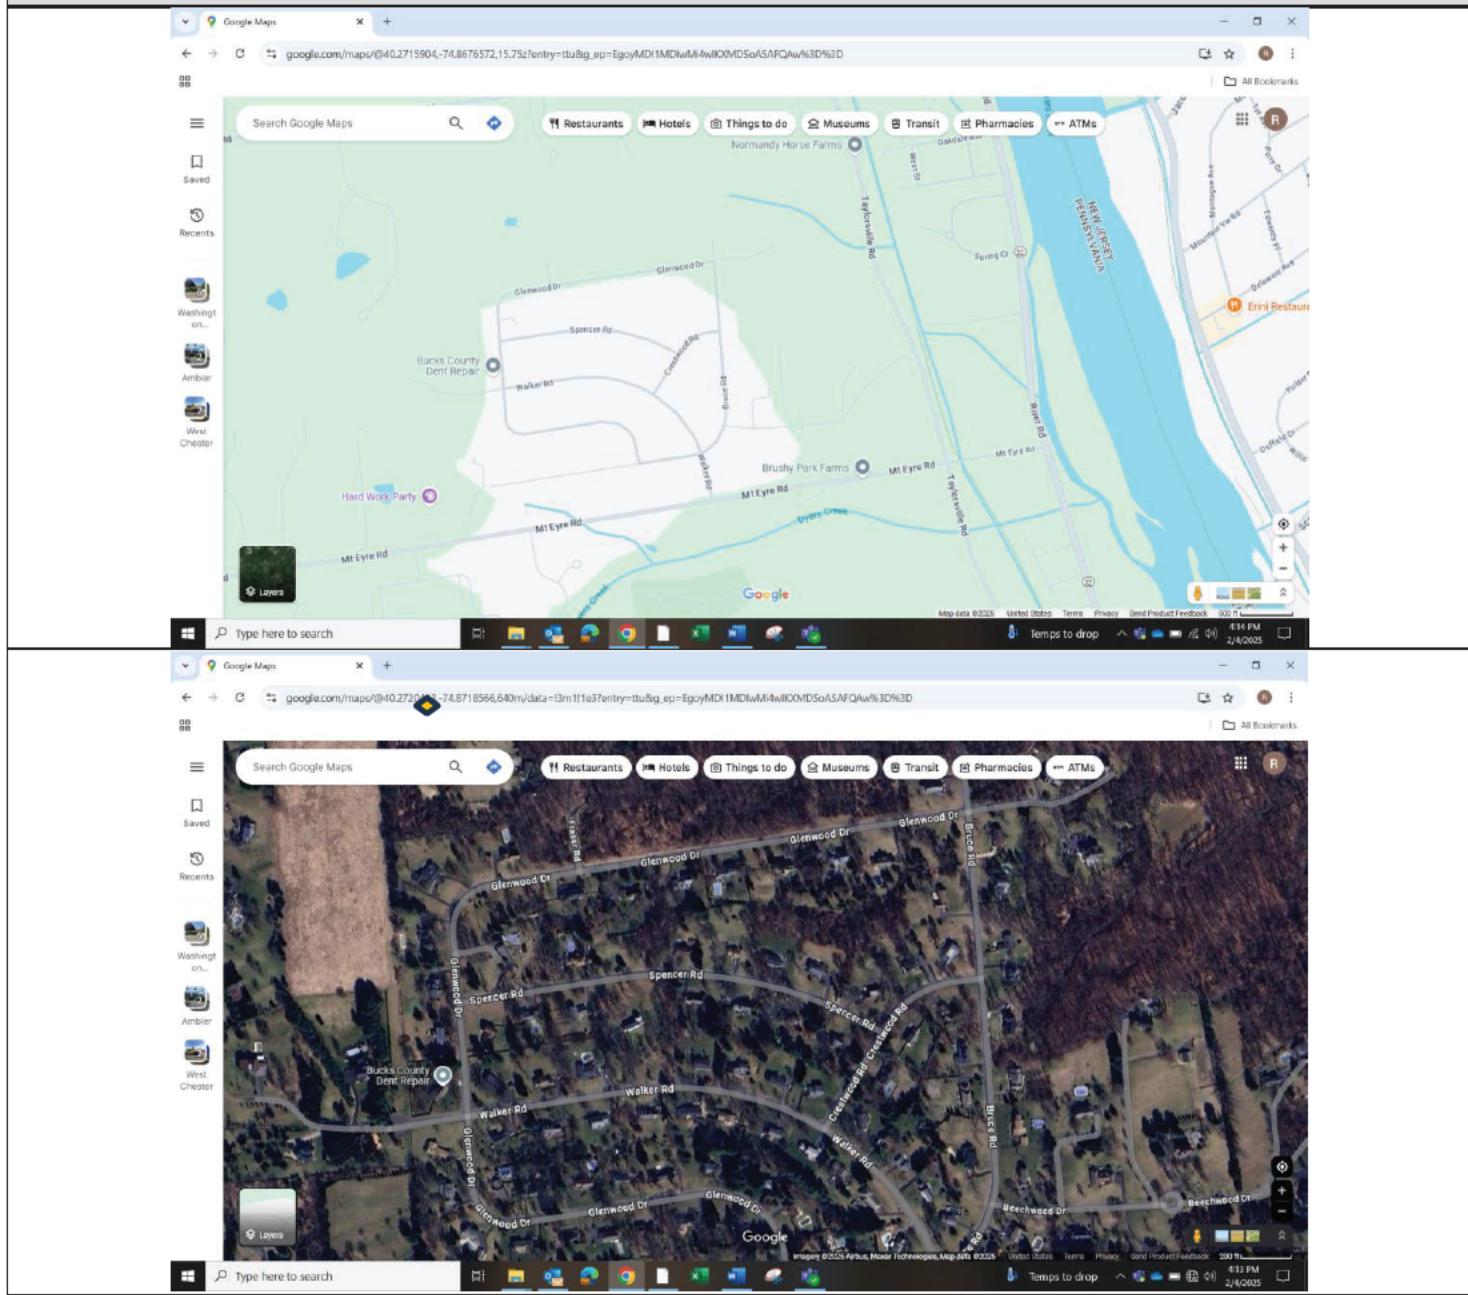

I arrived at the ET trailer at 10:44, there was no one present at it. As I was departing Jack Chaney arrived at the trailer. I asked him if he knew when Nancy was arriving, he said around noon. I thanked him and departed at 10:49am.
