MEMO

TO Air Quality Permit File PA-32-00055H

FROM Alan A. Binder *AAB*
Air Quality Engineering Specialist
Air Quality Program

THROUGH Mark R. Gorog, P.E. *MRG* Mark A. Wayner, P.E. *MAW*
Environmental Engineer Manager Program Manager
Air Quality Program Air Quality Program

DATE April 2, 2012

RE Comments and Response Document
Units 1 and 2 FGD Installation
EME Homer City Generation, LP
Homer City Generating Station
Black Lick & Center Townships, Indiana County
APS # 761412, Auth # 897196, PF # 262713

The Department has received an application for plan approval to install and begin operation of dry flue gas desulfurization ("FGD") systems with fabric filters and associated support equipment at EME Homer City Generation, LP's ("EME") Homer City Generating Station ("Homer City GS") located in Black Lick & Center Townships, Indiana County. Review of this application by the Department has been completed and copies of the draft plan approval and review memo were emailed to EME's Environmental Services Manager, Jeffrey Bard for review prior to issuance of the plan approval. This memo documents activity that has taken place since the review memo was finalized.

Notice of intent to issue the plan approval was published in the *Pennsylvania Bulletin* on February 11, 2012, published in the *Indiana Gazette* on February 4-6, 2012, and sent to the EPA on February 9, 2012, in accordance with the requirements of 25 Pa. Code § 127.44-46. All required methods of public notice were fulfilled as of February 11, 2012 and the normal 30-day public comment period ended at the close of business on March 12, 2012. The comment period was effectively extended until March 24, 2012, as a result of a public hearing held on March 14, 2012. EPA's 45-day comment period ended at the close of business on March 26, 2012. Notice of intent to issue was provided to the applicant on January 31, 2012, and the applicant fulfilled the requirement to publish the notice within 10 days of receipt.

Notice of a public hearing was published in the *Pennsylvania Bulletin* on February 11, 2012, and in the *Indiana Gazette* on February 4-6, 2012 in accordance with the requirements of 25 Pa.

Code § 127.48. The multiple methods of notice were fulfilled as of February 11, 2012. The public hearing was held at 5:00PM on Wednesday, March 14, 2012, at the Homer-Center High School, 70 Wildcat Lane, Homer City, PA 15748. After opening statements and presentations by both the Department and representatives of EME, the format of the hearing was structured first as a public meeting which allowed for questions and answers, followed by a hearing at which testimony was given. Approximately 600 persons were in attendance and the hearing lasted about 4 hours. A stenographer was present for the duration of the hearing and a transcript of the event was received by the Department on March 20, 2012. In accordance with 25 Pa. Code § 127.49(c), written statements and exhibits are accepted by the Department within 10 days after the hearing. The required public comment period was effectively extended to March 24, 2012, as a result of this hearing.

Thirty-six individuals provided testimony at the public hearing on March 14, 2012. See the full list of names in Attachment 1 to this document.

Approximately four thousand one hundred and fifteen individual public comments were handed to the Department by Matthew Vore during testimony given by Randy Francisco of the Sierra Club at the public hearing on March 14, 2012. See the full list of names in Attachment 2 to this document.

A one-page letter was received from Dreama VanCise, Indiana County resident, in conjunction with the question and answer session of the public hearing on March 14, 2012

Approximately two thousand and ninety-four individual public comment letters expressing support for the proposed scrubber installation were received between March 19, 2012, and March 28, 2012.

A one-page letter was received from Pennsylvania resident, Stephanie Ulmer, on March 22, 2012.

A one-page letter was received via email from Veronica Coptis, Community Organizer for Mountain Watershed Association, on March 22, 2012.

A nine-page letter including twenty-three attachments was received via email from Shannon Fisk of Earthjustice; on behalf of Sierra Club, Clean Air Council, and Group Against Smog and Pollution on March 23, 2012.

Twenty-six comments were received via email from Jeffrey Bard on behalf of EME on March 23, 2012.

Three hundred and thirty-two individual names were signed to a petition expressing support for the proposed scrubber installation, and were received from the International Brotherhood of Electrical Workers Local Union 459 on March 27, 2012

Nine hundred and seventy individual names were signed to a petition expressing support for the proposed scrubber installation, and were received from the United Mine Workers of America Local # 2193 on March 27, 2012

EPA sought clarification about the proposed turbine upgrades, could have accommodated emissions for greenhouse gases ("GHG") and CO, new source review analysis for PM_{2.5}, and startup/shutdown/malfunction emissions on March 1, 2012. Clarification was provided by email on March 2 and 8, 2012

All comments received up until the date of issuance have been considered

The response document is organized as follows: Many of the commentators had similar concerns and responses are provided for these "grouped" comments first. Individuals listed in Attachment 1 & 2 are connected to each comment by number reference following the comment. We then respond to individual comments. Commentators must recognize that this is an Air Quality Plan Approval and those issues that are within the scope of this application's review are those for which we are provided authority under the Pennsylvania Air Pollution Control Act and the Federal Clean Air Act and we have provided responses to those issues. Any comments not group or individually responded to have been read but are considered outside of the scope of this Plan Approval. Thank you for your interest and submittals.

COMMENTS AND RESPONSES:

GROUPED COMMENT CATEGORIES:

1. SO₂ EMISSION RATES AND NAAQS STANDARDS: Many of the written comments that were received at the public hearing and after state that the proposed [SO₂] emission rates in the Plan Approval are inadequate to ensure attainment of the 1-hour SO₂ NAAQS ("National Ambient Air Quality Standards"), or "EPA's science based standards to protect public health". Approximately half of those comments also state that air dispersion modeling performed by Sierra Club experts supports the above statement. (Attachment 1: 28, 31; Attachment 2: 1-4109)

RESPONSE: Section C. Condition #009 of the proposed Plan Approval requires the Owner/Operator to perform air dispersion modeling for Homer City GS prior to start-up of the [novel integrated desulfurization] NID systems in order to demonstrate that Homer City GS will not cause [an exceedance of] the SO₂ NAAQS. See below response to individual comment 4.m. for the insertion of "an exceedance of" wording into the condition. This is followed immediately by Condition #010 which requires the Owner/Operator to submit a protocol to and receive approval from the Department prior to performing the modeling. Results of the modeling are required to be submitted to the Department for review. The above conditions work in conjunction with Section E. Group Name: G01 Condition #001 to limit SO₂ emissions from Unit 1 & 2 to 0.20 lb/MMBtu or at a lower rate if necessary as demonstrated by the above air dispersion modeling to ensure that Homer City GS will not cause an exceedance of the SO₂ NAAQS.

2. SCRUBBER SYSTEM PARTICULATE MATTER EMISSIONS: Many of the written comments that were received at the public hearing express concern with potential increases in particulate matter emissions due to the operation of the scrubber systems proposed. (Attachment 1: 28; Attachment 2: 2042-4109)

RESPONSE: As part of the application review process, and in accordance with 25 Pa. Code § 127.1, a Best Available Technology ("BAT") analysis was performed for all new sources of particulate matter emissions proposed as part of this application. BAT for lime unloading includes unloading to either an underground hopper within a partially enclosed building controlled by dust collector(s) or unloading by enclosed transfer directly to storage silos. BAT for storage silo loading is enclosed transfer to and between storage silos controlled by bin vent filters and minimization of hours of operation. BAT for the byproduct handling systems is the use of bin vent filters and byproduct wetting prior to partially enclosed transfer to dump trucks. Existing vehicle, roadway, and landfill emission reduction practices will remain in effect at the facility. These include speed restrictions, roadway sweeping, and roadway and material wetting where applicable. Also, please refer to pages 6 and 7 of the Department's February 9, 2012, Review of Plan Approval Application for this project.

Prevention of Significant Deterioration and New Source Review analyses have been performed in accordance with 25 Pa. Code Chapter 127 Subchapters D & E to show that

this project does not cause a significant emissions increase or significant net emission increase. The proposed NID systems include fabric filters expected to have greater particulate matter control efficiency than the existing electrostatic precipitators which will remain active and in place. Both of these particulate matter control systems will reduce emissions from Unit 1 & 2. Actual and allowable facility-wide particulate matter emissions are expected to decrease as a result of this project. Additionally, actual emissions of SO₂, mercury, lead, sulfuric acid mist, hydrogen chloride, fluorides, and VOC from Unit 1 & 2 are also expected to decrease as a result of this project.

3. PUBLIC/PERSONAL HEALTH AND ENVIRONMENT: Many of the written comments that were received at the public hearing express concern over the potential impacts of Homer City GS on individual health, public health, and the environment. Specific concerns include potential impacts on premature deaths, heart attacks, asthma, cancer, lung disease, acute laryngitis, chronic bronchitis, aplastic anemia, chronic obstructive pulmonary disease, water, food, atmosphere, animals, and nature. (Attachment 1: 22, 28, 31, 25; Attachment 2: 1951-4110)

RESPONSE: The Clean Air Act required EPA to set National Ambient Air Quality Standards (NAAQS) for pollutants considered harmful to public health and the environment and establishes two levels of national air quality standards. Primary standards set limits to protect public health, including the health of "sensitive" populations such as asthmatics, children, and the elderly. Secondary standards set limits to protect public welfare, including protection against decreased visibility, damage to animals, crops, vegetation, and buildings. The use of computer models is the recognized method for predicting ambient air impact for new and modified sources under the Prevention of Significant Deterioration (PSD) regulations found in 40 CFR 52.21. These models consider background air quality, emissions from nearby sources, and representative meteorological data. Homer City GS is an existing major PSD facility because its potential to emit exceeds the major source threshold for multiple attainment pollutants. Installation of the proposed NID systems is expected to cause a reduction of SO₂, PM/PM₁₀/PM_{2.5}, mercury, lead, sulfuric acid mist, hydrogen chloride, fluorides, and VOC emissions from Unit 1 & 2. The project did not result in a significant and net significant emissions increase and therefore did not trigger PSD requirements (including for CO₂e). The Department however has required stack testing for PM, PM₁₀, PM_{2.5}, HCl, VOC, H₂SO₄ (including H₂SO₄ mist and SO₃), fluorides, lead, and mercury on Unit 1 & 2 stacks per 25 Pa. Code §127.12b. The use of continuous emissions monitors ("CEMS") will continue for NO_x and SO_x per requirements of TV-32-00055. Air dispersion modeling is also being required per 25 Pa. Code 127.12b for Homer City GS prior to startup of the NID systems in order to demonstrate that EPA's health based standards for SO₂ will not be exceeded by Homer City GS. See also above response to grouped comment #1.

4. SUPPORT FOR PROJECT: Many of the statements given during the public hearing and nearly all the written letters and petitions received after the public hearing express support for the proposed project. Specific expressions include support for the project as an environmental improvement; means of sustaining power grid stability and energy independence; provider of cheap electricity; economic and tax base for the region; and

preserver of jobs for power plant workers, coal miners, boiler makers, plumbers and pipefitters, construction workers, engineering service providers, electricians, outage contractors, and other supporting roles. (Attachment 1: 1-21, 23-27, 29-30, 32-34, 36; IBEW and UMWA Petitions; Approximately 2,094 letters received between March 19th and 28th, 2012, and additional letters after March 28, 2012)

RESPONSE: The Department acknowledges all those, as noted on page 2 of this document, who have submitted comments in favor of the project.

INDIVIDUAL COMMENTS & RESPONSES:

1. Mr. Peter Rocquemore, Washington D.C and Indiana County resident, testimony received at the public hearing on March 14, 2012.

- a. Comment regarding Homer City GS's contribution to premature deaths, healthcare costs, and asthma in children.

RESPONSE

See above response to Grouped Comment #3.

- b. Comment regarding investments in renewable energy within Indiana County as a means for taxes, cleaner air, cleaner water, and healthier kids.

RESPONSE

Considerations of renewable energy alternatives are outside of the scope of this Plan Approval application review.

2. Mr. Randy Francisco, Sierra Club member, testimony and written statement received at the public hearing on March 14, 2012.

- a. Comment regarding modeling done by Sierra Club experts determining that the proposed [SO₂] rates in the Plan Approval are inadequate to ensure attainment of the 1-hour SO₂ NAAQS.

RESPONSE

See above response to Grouped Comment #1.

- b. Comment regarding concern with potential increases in particulate matter emissions due to the operation of the scrubber systems proposed.

RESPONSE

See above response to Grouped Comment #2.

- c. Comment regarding Homer City GS contributing to 43 premature deaths, 72 heart attacks, and 660 asthma attacks annually.

RESPONSE

See above response to Grouped Comment #3.

- d. Comment regarding General Electric bringing green jobs to the region through renewable energy and employment trends in the energy industry.

RESPONSE

Considerations of renewable energy alternatives are outside of the scope of this Plan Approval application review.

3. Mr. Matthew Vore, Homer City resident, testimony received at the public hearing on March 14, 2012.

- a. Comment regarding environmental and health effects from coal-fired generating stations.

RESPONSE

See above response to Grouped Comment #3.

- b. Comment regarding negative health effects from Homer City GS SO₂ and proposed solution control methods not being enough to keep levels of SO₂ at a quality standard.

RESPONSE

See above response to Grouped Comment #1.

- c. Comment regarding the better investment of money in clean energy production, sale, and construction; and moving to safe and cleaner alternative energy sources.

RESPONSE

Considerations of renewable energy alternatives are outside of the scope of this Plan Approval application review.

4. Mr. Brian Hope, from Indiana, PA, testimony received at the public hearing on March 14, 2012.

- a. Comment regarding the study about 43 deaths per year from Homer City GS, 72 heat attacks, 660 asthma attacks, 32 hospital admissions, 25 cases of chronic bronchitis, and 30 ER asthma visits.

RESPONSE

See above response to Grouped Comment #3.

- b. Comment regarding unborn babies being affected by mercury in our water and clearing out mercury.

RESPONSE

The proposed NID systems including fabric filters and previously issued plan approval for installation of activated carbon injection ("ACI") systems at Homer City GS are expected to reduce mercury emissions from the facility. Please refer to pages 1, 5, and 12 of the Department's February 9, 2012, Review of Plan Approval Application for this project. Please also refer to the entirety of the Department's June 28, 2012, Review of Plan Approval Application for the ACI project (PA-32-00055G).

- c. Comment regarding issues of flyash.

RESPONSE

Existing flyash processed by Homer City GS's flyash handling system is considered outside of the scope of this project. Byproduct generated from the proposed NID system will enter the byproduct handling system and be added to the Facility's existing on-site permitted landfill area. Please refer to pages 2, 6, 13, and 14 of the Department's February 9, 2012, Review of Plan Approval Application for this project for a description of the byproduct handling system.

- d. Comment regarding sustainable economic opportunities in the event the plant closes.

RESPONSE

Considerations of contingencies in the event of a plant closure are outside of the scope of this Plan Approval application review.

- 5. Ms. Dreama VanCise, Indiana County resident, written questions and comment received at the public hearing on March 14, 2012.

- a. Question #1: When will the DEP begin air monitoring in Indiana County again?

RESPONSE

While generally outside of the scope of this Plan Approval, the Department has provided the following responses to these verbal and written question received during the question and answer session of the public hearing.

The Strongstown air quality monitor is located in Indiana County and is currently active. Based on modeling for Indiana County and the Pittsburgh area, EPA announced on April 15, 2004 that Indiana County was classified as non-compliant with the 8-hour National Ambient Air Quality Standard (NAAQS) for ozone and thus designated as an ozone nonattainment area. Therefore, a monitoring site was established in Strongstown at the end of 2004 with a continuous ozone analyzer to provide the necessary hard data to substantiate the ozone-compliance status of Indiana County.

Ozone is a secondary pollutant formed over time from a mixture of nitrogen oxides and volatile organic pollutants and be transported long distances. The

ozone levels seen in Indiana County are the result of emissions from industry, power generation and transportation sources from the Pittsburgh and industrial areas to the west. Because of the nature of ozone formation and transport, the ozone levels in given area generally do not vary in concentration, hence the designations on a county-wide basis. The latest ozone value generated from the Strongstown site (the 3-year average of the 4th-highest daily maximum 8-hour average)(for the period 2009-11) is 73 ppb...just under the NAAQS standard for ozone of 75 ppb.

Hourly monitoring data from the Strongstown monitor can be found at, <http://www.dep.state.pa.us/dep/deputate/airwaste/aq/aqm/psipitt.htm>.

- b. Question #2: Is it possible to have our air monitored closer to Indiana County areas of higher population density than where the current air monitor is in Strongstown?

RESPONSE

While generally outside of the scope of this Plan Approval, the Department has provided the following responses to these verbal and written question received during the question and answer session of the public hearing.

To make the most of the Department's limited resources, the site was located downwind of the large Homer City power plant and a continuous SO₂ monitor and meteorological equipment was added. When determining this site, consideration was also given to the stack heights of the plant. Too close to the plant, and the pollution would pass over top. The latest 1-hour SO₂ value from the site (90 ppb)(for the period 2008-10) is reading above the NAAQS standard for SO₂ of 75 ppb.

The Department is not currently planning on locating an additional monitoring site in Indiana County nor are we contemplating relocating the Strongstown site at this time.

- c. Question #3: How do we know what our outdoor air quality is if it is not monitored accurately?

RESPONSE

While generally outside of the scope of this Plan Approval, the Department has provided the following responses to these verbal and written question received during the question and answer session of the public hearing.

The equipment that we use for monitoring at our Commonwealth of Pennsylvania Air Monitoring System (COPAMS) is subject to a quality assurance program that includes regularly scheduled performance audits and precision checks.

6. Ms. Stephanie Ulmer, letter received March 22, 2012. Comments regarding dangerous levels of pollution from Homer City GS, disregard for public health, and degradation of the quality of life.

RESPONSE

See above responses to Grouped Comments #1 and #3.

7. Ms. Veronica Coptis of Mountain Watershed Association, email received March 22, 2012.

- a. Comment regarding setting Homer City GS SO₂ emission limits in compliance with the NAAQS, and Sierra Club air dispersion modeling.

RESPONSE

See above response to Grouped Comment #1

- b. Comment regarding coal contribution to negative health impacts.

RESPONSE

Thank you for submittal of *Coal's Assault of Human Health*. See above response to Grouped Comment #3

8. Mr. Jeffrey S. Bard, Environmental Services Manager, EME Homer City Generation LP, email received March 23, 2012, followed by hard copy received March 27, 2012. Twenty-six comments directly reference page numbers and condition numbers from the February 9, 2012, proposed plan approval.

- a. Comment #1 regarding the expected construction period and Plan Approval expiration date.

RESPONSE

Per 25 Pa. Code § 127.13(a), "Approval granted by the Department will be valid for a limited time, as specified by the Department in the approval..." The Department recognizes that construction of the proposed NID systems will occur over a lengthy time period. The Plan Approval expiration will be set at a date 30 months from the date of issuance to allow for the full expected construction period. Please be aware of EME's requirements to begin and continue with construction. Per 25 Pa. Code § 127.13(b), "If the construction, modification or installation is not commenced within 18 months of the issuance of the plan approval or if there is more than an 18-month lapse in construction, modification, or installation, a new plan approval application that meets the requirements of this subchapter and Subchapters D and E (relating to prevention of significant deterioration of air quality; and new source review) shall be submitted..."

- b. Comment #2 regarding the Responsible Official's name and title.

RESPONSE

The Responsible Official on page 1 of the proposed Plan Approval shall be corrected as follows:

Name: Bob[by] O. Duey

Title: ~~Director-Generating Station~~ [Managing Director]

- c. Comment #3 regarding the Plan Approval Contact Person's title.

RESPONSE

The Plan Approval Contact Person on page 1 of the proposed Plan Approval shall be corrected as follows:

Title: ~~Engineer~~ [Environmental Manager]

- d. Comment #4 regarding the wording of high pressure steam turbine efficiency upgrades in the Plan Approval Description on page 2 of the proposed Plan Approval.

RESPONSE

The Department recognizes that EME also utilizes intermediate pressure steam turbines at Homer City GS. It is our understanding that any steam turbine upgrades to be undertaken by EME will be done to offset electrical output efficiency losses due to control device retrofits. It is also our understanding that this would not impact heat capacity of the boilers, fuel or combustion parameters within the boilers, or debottleneck the system. Per Section C. Condition #008, "This approval does not authorize the Owner/Operator to increase the permitted heat input to Unit 1 & 2 as a result of the steam turbine efficiency upgrades..." The Plan Approval Description shall be modified as follows:

Plan Approval Description

...~~High-pressure s~~[S]team turbine efficiency upgrades for Unit 1 & 2 are also allowed under this Plan Approval.

- e. Comment #5 regarding the relocation of the previously authorized Activated Carbon Injection ("ACI") systems and the impact on the Permit Maps on page 5 of the proposed Plan Approval.

RESPONSE

The Permit Maps shall be corrected to reflect installing the ACI systems after the ESPs and before the NID systems for Unit 1 & 2. The proposed Alstom fabric filters associated with the NID systems are expected to achieve greater particulate matter control efficiency than the existing ESPs. This would result in an effective reduction of particulate matter potential to emit compared to the original ACI plan approval (PA-32-00055G).

- f. Comment #6 regarding references to CAA § 112(d) and 42 U.S.C.A. § 7412(d) under Section B., Condition #005, on page 7 of the proposed Plan Approval.

RESPONSE

Section B. of this plan approval is titled General Plan Approval Requirements and includes conditions that are expected to be relevant to all sources and facilities. CAA § 112(d) and 42 U.S.C.A. § 7412(d) relate to establishing emission standards for source categories of hazardous air pollutants. Subsection (2) under this section states that, "None of the measures described in subparagraphs (A) through (D) shall, consistent with the provisions of section 7414 (c) of this title, in any way compromise any United States patent or United States trademark right, or any confidential business information [CBI], or any trade secret or any other intellectual property right." These references do concern CBI and will remain under Section B., Condition #005 of the Plan Approval.

- g. Comment #7 regarding manufacturer's versus contractor's specifications and maintenance schedules and the recordkeeping requirements under Section C., Condition #001, on page 10 of the proposed Plan Approval.

RESPONSE

The Department understands that the contractor will be responsible for operating procedures and developing maintenance schedules for the NID systems. The last two items of Section C., Condition #001 shall be modified as follows:

- * The ~~manufacturer's recommended~~ **[developed]** maintenance schedule for, and all maintenance activities performed on, the NID systems.
- * The ~~manufacturer's recommended~~ **[developed]** maintenance schedule for, and all maintenance activities performed on, each bin vent collector.

In addition the following condition shall be added the plan approval:

The Owner/Operator shall develop an operation and maintenance (O&M) plan for the NID systems and submit the information to the Department for approval within 180 days of completion of optimization each NID system as verified by the EPC contractor [25 Pa. Code §127.12b].

- h. Comment #8 regarding malfunction reporting requirements under Section C., Condition #004a on page 10 of the proposed Plan Approval.

RESPONSE

This condition is also included in EME's most recent Title V Operating Permit (TV-32-00055) for Homer City GS as Section C. Condition #012. It is a site level condition applicable to the entire facility. While it was previously omitted from the recent auxiliary boiler and ACI plan approvals issued to EME, the Title V condition remains applicable and has also been included in PA-32-00055H.

- i. Comment #9 regarding submittal of reports on operation and maintenance of the source under Section C. Condition #004e on page 11 of the proposed Plan Approval.

RESPONSE

This condition is also included in EME's most recent Title V Operating Permit (TV-32-00055) for Homer City GS as Section C. Condition #012. It is a site level condition applicable to the entire facility. While it was previously omitted from the recent auxiliary boiler and ACI plan approvals issued to EME, the Title V condition remains applicable and has also been included in PA-32-00055H. This condition is included under the heading "Malfunction reporting shall be conducted as follows:" and is in reference to additional reporting that may be required by the Department as a result of a malfunction.

- j. Comment #10 regarding operation and maintenance according to manufacturer's specifications and recommendations respectively, under Section C. Condition #005 on page 11 of the proposed Plan Approval.

RESPONSE

The Department understands that the contractor will be responsible for operating procedures and developing maintenance schedules for the NID systems. Section C., Condition #005 shall be modified as follows:

All air contamination sources and air cleaning devices authorized under this Plan Approval shall be operated ~~per the manufacturer's specifications~~ **[according to the developed operating procedures]** and maintained according to the ~~manufacturer's recommended~~ **[developed]** maintenance schedule.

- k. Comment #11 regarding the wording of high pressure steam turbine efficiency upgrades under Section C. Condition #006 on page 11 of the proposed Plan Approval.

RESPONSE

See above response to Comment #4. Section C. Condition #006 shall be modified as follows:

~~"...High pressure s~~**[S]**team turbine efficiency upgrades for Unit 1 & 2 are also allowed under this Plan Approval.

- l. Comment #12 regarding inserting "emissions from" as the target of the NID systems controls under Section C. Condition #007 on page 11 of the proposed Plan Approval.

RESPONSE

The function of the NID systems is to control emissions from Unit 1 & 2. Inserting the proposed language serves as clarification of this function. The last item of Section C. Condition #007 shall be modified as follows:

* Two (2) Alstom, Novel Integrated Desulfurization ("NID") systems, including Alstom pulse jet fabric filters, capable of controlling **[emissions from]** Unit 1 and 2.

- m. Comment #13 regarding "non-compliance with" versus "an exceedance of" wording under Section C. Condition #009 on page 12 of the proposed Plan Approval.

RESPONSE

The Department agrees that "an exceedance of" is more accurate terminology in reference to the NAAQS. The proposed replacement does not change the intent of the condition. Section C. Condition #009 shall be modified as follows:

The Owner/Operator shall perform air dispersion modeling for the Facility prior to start-up of the NID systems in order to demonstrate that the Facility will not cause ~~non-compliance with~~ **[an exceedance of]** the SO₂ NAAQS.

- n. Comment #14 regarding adding reference to the air dispersion modeling required by Condition #009 under Section C. Condition #010 on page 12 of the proposed Plan Approval.

RESPONSE

It is the Department's intent that the air dispersion modeling protocol required be in reference to the modeling required under Condition #009. The first sentence of Section C. Condition #010 shall be modified as follows:

The Owner/Operator shall submit an air dispersion modeling protocol to the Department for review and approval prior to performing the modeling **[required under Condition #009]...**

- o. Comment #15 regarding removing "for this authorization" from Section C. Condition #011 on page 12 of the proposed Plan Approval.

RESPONSE

"This authorization" is made in reference to DEP Auth ID: 897196 found in the lower left-hand corner of each page of PA-32-00055H. The Department has multiple reviewers of plan approval applications but only one reviewer specific to each authorization.

- p. Comment #16 regarding the wording of emission testing that may be required under Section C. Condition #013 on page 12 of the proposed Plan Approval.

RESPONSE

It is the Department's intent to optionally require emission testing by the permittee [EME] in the event that the Department has cause to believe that air contaminant emissions from the sources listed in this Plan Approval may be in excess of the limitations specified in, or established pursuant to this plan approval

or the permittee's operating permit. The first sentence of Section C. Condition #013 shall be modified as follows:

~~If, at any time,~~ the Department has cause to believe that air contaminant emissions from the sources listed in this Plan Approval may be in excess of the limitations specified in, or established pursuant to this plan approval or the permittee's operating permit, the permittee may be required to conduct **[emissions tests using such] test** methods and procedures deemed necessary by the Department to determine the actual emissions rate.

- q. Comment #17 regarding correcting the position of the ACI control in the Unit 1 flow chart at the top of page 14, Section D. Source ID: 031, of the proposed Plan Approval.

RESPONSE

See above response to Comment #5. The flow chart at the top of each Source Level Plan Approval Requirements section is derived from the Permit Maps in Section A. of each Plan Approval. Correcting the Permit Maps section will correct all other flow charts.

- r. Comment #18 regarding correcting the position of the ACI control in the Unit 2 flow chart at the top of page 15, Section D. Source ID: 032, of the proposed Plan Approval.

RESPONSE

See above response to Comment #5. The flow chart at the top of each Source Level Plan Approval Requirements section is derived from the Permit Maps in Section A. of each Plan Approval. Correcting the Permit Maps section will correct all other flow charts.

- s. Comment #19 regarding quarterly Method 9 readings and the opacity limit under Section D. Source ID: 110 Condition #001 on page 16 of the proposed Plan Approval.

RESPONSE

It is not the Department's intent to require periodic Method 9 opacity readings on the storage silo bin vent filters at this time. Per the Department's regulatory analysis of this plan approval application, the proposed storage silos are not NSPS Subpart OOO affected sources which are required to have opacities verified by Method 9 readings. Section D. Source ID: 110 Condition #004 requires weekly visible emission inspections and corrective actions to be taken in the event of any apparent visible emissions. Method 9 readings are not considered necessary to determine if there are any apparent visible emissions. Compliance with the 10% opacity limit may be determined at any time by Department field inspectors who are certified visible emissions evaluators.

- t. Comment #20 regarding quarterly versus weekly inspections and Method 9 opacity readings on the storage silo bin vent filters under Section D. Source ID: 110 Condition #004 on page 16 of the proposed Plan Approval.

RESPONSE

See above response to Comment #19. Weekly inspections are considered to be sufficient at this time. This is consistent with the frequency of inspections required for the lime storage silos associated with similar FGD systems at Keystone Power Plant. Frequency of the inspections may be reduced at a later date upon establishment of a sufficient period of operation as approved by the Department.

- u. Comment #21 regarding limitations on the lime delivery methods, storage silo identification, and transfer methods under Section D. Source ID: 110 Condition #005 on page 17 of the proposed Plan Approval.

RESPONSE

Section D. Source ID: 110 Condition #003 currently limits lime deliveries by truck to no greater than 47,654.4 tons per year as a 10% capacity limit on total lime deliveries. This serves as a limitation on the potential to emit fugitive PM/PM₁₀/PM_{2.5} from paved facility roadways due to truck lime deliveries. It is not the Department's intent to impose additional restrictions without basis or function. Lime delivered by truck is required to be transferred to the same point as the railcar deliveries or otherwise directly to storage silos which may be downstream from the underground hopper delivery point. Therefore the potential emissions truck lime deliveries are equal to or less than by rail after potential roadway fugitive emissions are accounted for.

Railcar storage silos are defined in the plan approval application as the silos which receive lime after delivery to the underground hopper. While these storage silos may also receive lime delivered by truck, the "railcar" identifier will be retained to be consistent with the application and to indicate that these are the first set of storage silos after delivery to the underground hopper.

Bulk storage silos are defined in the plan approval application as the storage silos following the railcar silos and prior to the day storage bins for the NID systems. Reference to the "bulk" storage silos may be removed from the condition without changing the intent or allowing an increase in potential emissions. Truck unloading to the underground hoppers is allowed in the same condition and any unloading directly to storage silos would not cause an increase in potential emissions.

The requirement for all truck load-out directly to storage silos be done by pneumatic transfer may be considered to be unnecessarily burdensome. The functional intent of the wording is so that the material transfer is not an emission point in itself. Pneumatic may be replaced with enclosed to ensure the condition remains functionally the same for emission purposes while being less restrictive.

Section D. Source ID: 110 Condition #005 shall be modified as follows:

Lime may be delivered to the Facility by the following methods:

* Railcar with transfer to underground hoppers followed by transfer to the railcar storage silos equipped with bin vent filters; or, ~~(only in the event of maintenance on or upon unexpected unavailability of the rail system)~~

* Enclosed trucks with transfer to the underground rail load-out hoppers or ~~pneumatic~~ **[enclosed]** transfer to the bulk storage silos equipped with bin vent filters.

- v. Comment #22 regarding restrictiveness of submitting vendor-supplied bin vent filter specifications to the Department within 15 days of selection under Section D. Source ID: 110 Condition #008 on page 17 of the proposed Plan Approval.

RESPONSE

The Department agrees with the proposal to change the requirements for submittal of the bin vent filter specifications from “within 15 days of selection” to “60 days prior to installation”. This allows adequate time for the Department to review the specifications and determine compliance with the requirement to obtain a guaranteed maximum outlet concentration of particulate matter not to exceed 0.004 gr/dscf. Other minor changes have been made to the condition for clarity. Section D. Source ID: 110 Condition #008 shall be modified as follows:

The Owner/Operator shall submit vendor-supplied bin vent filter specifications to the Department ~~within 15 days of selecting the specific bin vent fabric collectors to be installed~~ **[at least 60 days prior to installing the bin vent filters]** at the Facility. These specifications shall include a guaranteed maximum **[outlet]** concentration of particulate matter not ~~in excess of~~ **[to exceed]** 0.004 gr/dscf.

- w. Comment #23 regarding “non-compliance with” versus “an exceedance of” wording, and wording of the boiler startup definition under Section E. Group Name: G01 Condition #001 on page 18 of the proposed Plan Approval.

RESPONSE

See above response to Comment #13. The purpose of the startup definition within the condition is to specify when the NID systems are required to be in operation and when the applicable emission limit will be in effect.

The Department proposes to add further clarification to this condition in order to specify that the referenced air dispersion modeling is to be performed according to a Department-approved protocol and have the results reviewed and approved by the Department. The first part of Section E. Group Name: G01 Condition #001 shall be modified as follows:

Emissions of SO₂ from Unit 1 & 2 shall not exceed the following:

* 0.20 lb/MMBtu from each Unit on a 30-day rolling average (excluding periods of startup or shutdown), and the emission rate demonstrated by air dispersion modeling **[required by Section C. Conditions #009 and #010]** showing that the Facility will not cause ~~non-compliance with~~ **[an exceedance of]** the SO₂ NAAQS; and...

* 5,950 tons from each Unit in a consecutive 12-month period beginning after 1 year of operation of each NID system, and the emission rate demonstrated by air dispersion modeling **[required by Section C. Conditions #009 and #010]** showing that the Facility will not cause ~~non-compliance with~~ **[an exceedance of]** the SO₂ NAAQS.

Startup for Unit 1 & 2 is defined as beginning upon firing fuel in a boiler after a shutdown event for any purpose and ending when any of the steam from the boiler is used to generate electricity for sale over the grid or for any other purpose (including on-site use). Startup duration may not exceed ~~the lesser of 6 hours or~~ the time necessary to reach the minimum effective operating temperature of the NID system.

- x. Comment #24 regarding “as certified by the manufacturer” versus “as verified by the EPC contractor” wording under Section E. Group Name: G01 Condition #004 on page 18 of the proposed Plan Approval.

RESPONSE

See above response to Comment #7. The first sentence of Section E. Group Name: G01 Condition #004 shall be modified as follows:

The Owner/Operator shall perform EPA Method stack testing for PM, PM₁₀, PM_{2.5}, HCl, VOC, H₂SO₄ (including H₂SO₄ mist and SO₃), fluorides, lead, and mercury on the Unit 1 & 2 stacks at the Facility within 60 days of completion of optimization of each NID system as ~~certified by the manufacturer~~ **[verified by the EPC contractor]**.

- y. Comment #25 regarding inserting “as identified in the PADEP approved protocol” in Section E. Group Name: G01 Condition #004c. on page 19 of the proposed Plan Approval.

RESPONSE

Relevant operating parameters during stack testing may be identified in the protocol to be approved by the Department. This request serves to add clarity to the condition. The first sentence of Section E. Group Name: G01 Condition #004c. shall be modified as follows:

All relevant operating parameters **[as identified in the Department-approved pre-test protocol]** (e.g boiler steam flow, air flow, gross megawatts, and O₂; CEMS heat input and stack flue gas volumetric flow rate; and NID hydrated lime

feed flow rate, pressure differential, and temperature) shall be recorded during the duration of the stack tests.

- z. Comment #26 regarding the relevance of Section E. Group Name: G01 Condition #004i. on page 19 of the proposed Plan Approval.

RESPONSE

Subsection i. is intended to be included within the performance testing condition for instances when emission testing is required under any applicable Federal regulations in addition to any State requirements. The Department is not aware of any applicable Federal regulations in relation to the testing requirements of this Plan Approval. Section E. Group Name: G01 Condition #004i. shall be removed from the Plan Approval. EME is subject to all applicable federal reporting requirements regardless of the inclusion of those requirements in a plan approval or Title V Operating Permit.

- 9. Ms. Shannon Fisk of Earthjustice; on behalf of Sierra Club, Clean Air Council, and Group Against Smog and Pollution, email received March 23, 2012.

- a. Comment regarding fine particulate matter emissions from the plant estimated to annually cause 43 premature deaths, 72 heart attacks, 660 asthma attacks, 33 hospital admissions, and impose a public health related economic cost on society of approximately \$330 million. Page 1

RESPONSE

See above response to Grouped Comment #3.

- b. Comments regarding the percentage SO₂ reduction or SO₂ emission limit required to demonstrate attainment with the 1-hour SO₂ NAAQS. Pages 2, 5, 6, and 9.

RESPONSE

See above response to Grouped Comment #1.

- c. Comment regarding doubt that NID systems can achieve the necessary reduction of SO₂ emissions for Homer City GS to comply with the 1-hr SO₂ NAAQS. Page 2.

RESPONSE

See above response to Grouped Comment #1.

- d. Comments regarding Homer City GS Unit 1 as a major source of GHG emissions triggering BACT for GHG emissions increases as a result of this project. Pages 2, 6, 7, and 9.

RESPONSE

The Department considers that EME has provided a satisfactory showing that any Unit 1 GHG emission increases could have been accommodated during the

baseline period. Please refer to pages 10 and 11 of the Department's February 9, 2012, Review of Plan Approval Application for this project. See also the above response to Grouped Comment #3.

- e. Comments regarding the proposed plan approval failing to require monitoring provisions to ensure continuous compliance with the proposed plan approval emission limits. Pages 2, 7, 8, and 9.

RESPONSE

The proposed plan approval incorporates new emission limits on SO₂, PM (filterable + condensable), and PM (filterable). Homer City GS is currently operating and will continue to operate SO₂ continuous emission monitors ("CEMS") as required by TV-32-00055. These monitors are considered sufficient to determine continuous compliance with existing and proposed SO₂ emission limits. Additionally, the Department believes that testing requirements established in this authorization and the existing TVOP are sufficient to determine compliance with the remaining emission limits.

- f. Comment regarding proposed plan approval does not satisfy the requirements of the CAA. Page 2.

RESPONSE

See above response to Grouped Comment #1, #2, and #3.

- g. Comment regarding proposed plan approval does not adequately protect public health. Page 2.

RESPONSE

See above response to Grouped Comment #3.

- h. Comment regarding Pa. Code § 127.25(a)(6). Page 4

RESPONSE

The cited regulatory reference does not exist.

- i. Comment regarding TV-32-00055 Section C Condition #008(f)(2) requirement for permits issued under this section to prohibit exceeding applicable emission rates or standards, including ambient air quality standards. Page 4.

RESPONSE

See above response to Grouped Comment #1.

- j. Comment stating the Clean Air Act requires that decisions be made only "after adequate procedural opportunities for informed public participation in the decision making process." Page 4.

RESPONSE

See pages 1 and 2 of this document for references to the public notice provisions of 25 Pa. Code §§ 127.44-48.

- k. Comment regarding excluding emissions that are “unrelated to the particular project.” Page 7.

RESPONSE

Excluded emissions have been actually achieved during the baseline period. Unit 1 & 2 were previously capable of operating and actually did at capacities above that of the PAE time period, therefore the increase is considered unrelated to project. Per Section C. Condition #008, “This approval does not authorize the Owner/Operator to increase the permitted heat input to Unit 1 & 2 as a result of the steam turbine efficiency upgrades...” See also above response to Grouped Comment #3.

- l. Comment regarding steam turbine upgrades fully offsetting NID systems parasitic load. Page 7.

RESPONSE

Please refer to page 2 of the Department’s February 9, 2012, Review of Plan Approval Application for this project. Also see Section C. Condition #008 of the proposed plan approval.
