Re: Technical Review Letter – Minor Modification to Waste Permit  
Westmoreland Sanitary Landfill  
Rostraver Township, Westmoreland County  
Permit I.D. No. 100277  
Authorization No. 1513310

Dear Brian Stewart:

The Department of Environmental Protection (Department) has reviewed the above-referenced permit modification application submitted for the Noble Environmental, Inc. Westmoreland Sanitary Landfill received on January 14, 2025. The application was deemed administratively complete on January 24, 2025.

As part of the technical review of the application, the following technical deficiencies have been identified.

1. The monitoring point presented for inclusion into the Water Quality Monitoring Network was identified in the application as PZ-6A. The monitoring point was identified as such in the attached Groundwater Monitoring Plan, and the Piezometer Log. The monitoring point was identified in the Form 18: Water Quality Monitoring System Phase II as PZ-6AU. As this monitoring point will be inserted into the permit as a permanent monitoring point, the name of the monitoring point must be consistent throughout the application.

The applicant should determine the correct name designated for this monitoring point. The applicant should revise the incorrect documents to represent the corrected name of the monitoring point. The corrected documents should be submitted to the Department via the public upload tool.

Please submit a response to these deficiencies within 60 days of receipt of this letter. Failure to respond to this letter within the allotted time may cause delay in the permit review or potential denial of the application.

If you have any questions about the permit review process or requirements of the Solid Waste Management Act, please contact me at [mabarch@pa.gov](mailto:mabarch@pa.gov) or (412) 442-4159 and include Permit I.D. No. 100277 and Authorization No. 1513310.

Sincerely,

Matthew D. Barch, P.G.
