Analytical Results Report For

Michael Baker International

Project Erie Coke 188511-3020
Workorder 3391582
Report ID 386370 on 2/7/2025 (Revised report. See Project Notations Section.)

Certificate of Analysis

Enclosed are the analytical results for samples received by the laboratory on Dec 11, 2024.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Elizabeth Parker (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Global.

Reference

Notes

- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
- Except as qualified, Clean Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 136, including but not limited to the following EPA Method reference revisions:
  EPA 300.1 Rev. 1.0-1997
  EPA 300.0 Rev. 2.1-1993
  EPA 353.2 Rev. 2.0-1993
  EPA 410.4 Rev. 1.0-1993
  EPA 420.4 Rev. 1.0-1993
  EPA 365.1 Rev. 2.0-1993
  EPA 200.7 Rev. 4.4-1994
  EPA 200.8 Rev. 5.4-1994
  EPA 245.1 Rev. 3.0-1994
- Except as qualified, Safe Drinking Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 141.
- The Chain of Custody document is included as part of this report.
- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
- For microbiological analyses, the "Prepared" value is the date/time into the incubator and the "Analyzed" value is the date/time out the incubator.
- An Analysis-Prep Method Cross Reference Table is included after Analytical Results & Qualifiers section in this report.
- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND) above the MDL
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Practical Quantitation Limit for this Project
ND	Not Detected - indicates that the analyte was Not Detected
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits
#	Please reference the result in the Results Section for analyte-level flags.

Project Notations

P1 This report was revised to include total Zinc results for ALS#3391582007, total Arsenic results for ALS#3391582001, Acenaphthylene for ALS#3391582008 and Carbazole for ALS#3391582009. EXP 2/4/25

Sample Notations

Lab ID	Sample ID

Result Notations

Notation Ref.	
E	Result reported exceeds instrument calibration
1	The QC sample type LCS for method SW846 8270E was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 37.3 and the control limits were 38 to 115.
2	The Total Acidity is titrated to a pH of 8.3 and reported as mg CaCO3/L.
3	The Total Alkalinity is titrated to a pH of 4.5 and reported as mg CaCO3/L.
4	The pH analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.
5	The concentration of this analyte was greater than 4 times the concentration of the spike added to the matrix spike. According to protocol, the calculation for percent recovery of the matrix spike is not valid.
6	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 40.7 and the control limits were 41 to 145. This result was reported at a dilution of 1.
7	The recovery of the Matrix Spike (MS) associated to this analyte was outside of the established control limits. The sample was post-digestion spiked, and this matrix spike was within acceptable recovery limits.
8	The QC sample type MSD for method SW846 6010C was outside the control limits for the analyte Antimony, Dissolved. The % Recovery was reported as 65.3 and the control limits were 75 to 125.
9	The QC sample type MS for method SW846 6010C was outside the control limits for the analyte Antimony, Dissolved. The % Recovery was reported as 62.6 and the control limits were 75 to 125.
10	The QC sample type MSD for method SW846 6010C was outside the control limits for the analyte Calcium, Dissolved. The % Recovery was reported as 21.8 and the control limits were 75 to 125.
11	The QC sample type MS for method SW846 6010C was outside the control limits for the analyte Magnesium, Dissolved. The % Recovery was reported as 130 and the control limits were 75 to 125.
12	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte Butylbenzylphthalate. The % Recovery was reported as 124 and the control limits were 80 to 120.
13	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte Di-n-Octylphthalate. The % Recovery was reported as 125 and the control limits were 80 to 120.
14	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte bis(2-Ethylhexyl)phthalate. The % Recovery was reported as 124 and the control limits were 80 to 120.
15	The surrogate 2-Fluorophenol for method SW846 8270E was outside of control limits. The % Recovery was reported as 167 and the control limits were 10 to 85. This result was reported at a dilution of 100.
16	The surrogate Phenol-d5 for method SW846 8270E was outside of control limits. The % Recovery was reported as 63 and the control limits were 7 to 56. This result was reported at a dilution of 100.
17	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 41 to 145. This result was reported at a dilution of 100.
18	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 26.3 and the control limits were 41 to 145. This result was reported at a dilution of 4.
19	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 27.8 and the control limits were 41 to 145. This result was reported at a dilution of 1.

20	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 37.6 and the control limits were 41 to 145. This result was reported at a dilution of 20.
21	The surrogate 2-Fluorophenol for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 10 to 85. This result was reported at a dilution of 200.
22	The surrogate Phenol-d5 for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 7 to 56. This result was reported at a dilution of 200.
23	The surrogate Nitrobenzene-d5 for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 32 to 125. This result was reported at a dilution of 200.
24	The surrogate 2-Fluorobiphenyl for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 24 to 116. This result was reported at a dilution of 200.
25	The surrogate 2,4,6-Tribromophenol for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 23 to 131. This result was reported at a dilution of 200.
26	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 37.3 and the control limits were 41 to 145. This result was reported at a dilution of 10.
27	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 41 to 145. This result was reported at a dilution of 200.
28	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 40.5 and the control limits were 41 to 145. This result was reported at a dilution of 1.
29	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 35.4 and the control limits were 41 to 145. This result was reported at a dilution of 20.
30	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 36.7 and the control limits were 41 to 145. This result was reported at a dilution of 1.
31	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 31.2 and the control limits were 41 to 145. This result was reported at a dilution of 4.

Analytical Results Report For

Michael Baker International

Project Erie Coke 188511-3020
Workorder 3391836
Report ID 380378 on 1/9/2025

Certificate of Analysis

Enclosed are the analytical results for samples received by the laboratory on Dec 12, 2024.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Elizabeth Parker (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Global.

Reference

Notes

- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
- Except as qualified, Clean Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 136, including but not limited to the following EPA Method reference revisions:
  EPA 300.1 Rev. 1.0-1997
  EPA 300.0 Rev. 2.1-1993
  EPA 353.2 Rev. 2.0-1993
  EPA 410.4 Rev. 1.0-1993
  EPA 420.4 Rev. 1.0-1993
  EPA 365.1 Rev. 2.0-1993
  EPA 200.7 Rev. 4.4-1994
  EPA 200.8 Rev. 5.4-1994
  EPA 245.1 Rev. 3.0-1994
- Except as qualified, Safe Drinking Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 141.
- The Chain of Custody document is included as part of this report.
- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
- For microbiological analyses, the "Prepared" value is the date/time into the incubator and the "Analyzed" value is the date/time out the incubator.
- An Analysis-Prep Method Cross Reference Table is included after Analytical Results & Qualifiers section in this report.
- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND) above the MDL
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Practical Quantitation Limit for this Project
ND	Not Detected - indicates that the analyte was Not Detected
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits
#	Please reference the result in the Results Section for analyte-level flags.

Project Notations

Sample Notations

Lab ID	Sample ID

Result Notations

Notation Ref.	
1	The QC sample type DUP for method SM2310B-2011 was outside the control limits for the analyte Acidity, Total. The RPD was reported as 29.3 and the upper control limit is 20.
2	The Total Acidity is titrated to a pH of 8.3 and reported as mg CaCO3/L.
3	The Total Alkalinity is titrated to a pH of 4.5 and reported as mg CaCO3/L.
4	The pH analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.
5	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte Butylbenzylphthalate. The % Recovery was reported as 123 and the control limits were 80 to 120.
6	The QC sample type MS for method SW846 8260D was outside the control limits for the analyte Chloroethane. The % Recovery was reported as 215 and the control limits were 51 to 142.
7	The QC sample type MSD for method SW846 7470A was outside the control limits for the analyte Mercury, Total. The RPD was reported as 23 and the upper control limit is 20.
8	The QC sample type MS for method SW846 6010C was outside the control limits for the analyte Calcium, Dissolved. The % Recovery was reported as -44.2 and the control limits were 75 to 125.
9	The QC sample type MS for method SW846 6010C was outside the control limits for the analyte Magnesium, Dissolved. The % Recovery was reported as 74.4 and the control limits were 75 to 125.
11	The QC sample type MSD for method EPA 300.0 was outside the control limits for the analyte Sulfate. The % Recovery was reported as 64.1 and the control limits were 80 to 120.
12	The QC sample type MS for method EPA 300.0 was outside the control limits for the analyte Sulfate. The % Recovery was reported as 72.5 and the control limits were 80 to 120.

Duplicate 3922545 (DUP) 3391762007 (non-Project Sample) For QC Batch 1359708

****NOTE - The Original Result and Duplicate Result shown below are raw results and are only used for the purpose of calculating Sample Duplicate percent recoveries. This result is not a final value and cannot be used as such.

RESULTS

Compound	CAS No		Result (umhos/cm)	Orig. Result (umhos/cm)		Qualifiers
Specific Conductance	Cond	DUP	300	257	RPD 15.40* (Max-10)	

Duplicate 3922551 (DUP) 3393173002 (non-Project Sample) For QC Batch 1359708

****NOTE - The Original Result and Duplicate Result shown below are raw results and are only used for the purpose of calculating Sample Duplicate percent recoveries. This result is not a final value and cannot be used as such.

RESULTS

Compound	CAS No		Result (umhos/cm)	Orig. Result (umhos/cm)		Qualifiers
Specific Conductance	Cond	DUP	942	937	RPD 0.53 (Max-10)	

Duplicate 3922547 (DUP) 3391836003 For QC Batch 1359708

****NOTE - The Original Result and Duplicate Result shown below are raw results and are only used for the purpose of calculating Sample Duplicate percent recoveries. This result is not a final value and cannot be used as such.

RESULTS

Compound	CAS No		Result (umhos/cm)	Orig. Result (umhos/cm)		Qualifiers
Specific Conductance	Cond	DUP	1849	1847	RPD 0.11 (Max-10)	

Duplicate 3922549 (DUP) 3391836013 For QC Batch 1359708

****NOTE - The Original Result and Duplicate Result shown below are raw results and are only used for the purpose of calculating Sample Duplicate percent recoveries. This result is not a final value and cannot be used as such.

RESULTS

Compound	CAS No	Result (umhos/cm)	Orig. Result (umhos/cm)	Qualifiers

Analytical Results Report For

Michael Baker International

Project Erie Coke 188511-3020
Workorder 3392161
Report ID 380819 on 1/11/2025

Certificate of Analysis

Enclosed are the analytical results for samples received by the laboratory on Dec 13, 2024.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Elizabeth Parker (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Global.

Reference

Notes

- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
- Except as qualified, Clean Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 136, including but not limited to the following EPA Method reference revisions:
  EPA 300.1 Rev. 1.0-1997
  EPA 300.0 Rev. 2.1-1993
  EPA 353.2 Rev. 2.0-1993
  EPA 410.4 Rev. 1.0-1993
  EPA 420.4 Rev. 1.0-1993
  EPA 365.1 Rev. 2.0-1993
  EPA 200.7 Rev. 4.4-1994
  EPA 200.8 Rev. 5.4-1994
  EPA 245.1 Rev. 3.0-1994
- Except as qualified, Safe Drinking Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 141.
- The Chain of Custody document is included as part of this report.
- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
- For microbiological analyses, the "Prepared" value is the date/time into the incubator and the "Analyzed" value is the date/time out the incubator.
- An Analysis-Prep Method Cross Reference Table is included after Analytical Results & Qualifiers section in this report.
- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND) above the MDL
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Practical Quantitation Limit for this Project
ND	Not Detected - indicates that the analyte was Not Detected
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits
#	Please reference the result in the Results Section for analyte-level flags.

Project Notations

Sample Notations

Lab ID	Sample ID

Result Notations

Notation Ref.	
1	Bromomethane was recovered below the 20 percent 8260D criteria in the continuing calibration verification associated with this sample. The % drift was reported at -25.64%. Acceptable limits are +/-20%.
2	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 38.4 and the control limits were 41 to 145. This result was reported at a dilution of 1.
3	The Total Acidity is titrated to a pH of 8.3 and reported as mg CaCO3/L.
4	The Total Alkalinity is titrated to a pH of 4.5 and reported as mg CaCO3/L.
5	The pH analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.
6	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 36.7 and the control limits were 41 to 145. This result was reported at a dilution of 1.
7	The QC sample type MS for method EPA 300.0 was outside the control limits for the analyte Chloride. The % Recovery was reported as 121 and the control limits were 80 to 120.
8	The QC sample type MS for method EPA 300.0 was outside the control limits for the analyte Nitrate-N. The % Recovery was reported as 134 and the control limits were 80 to 120.
9	The QC sample type MSD for method EPA 300.0 was outside the control limits for the analyte Nitrate-N. The % Recovery was reported as 133 and the control limits were 80 to 120.
10	The QC sample type MS for method EPA 300.0 was outside the control limits for the analyte Sulfate. The % Recovery was reported as 131 and the control limits were 80 to 120.
11	The QC sample type MSD for method EPA 300.0 was outside the control limits for the analyte Sulfate. The % Recovery was reported as 123 and the control limits were 80 to 120.
12	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 40.7 and the control limits were 41 to 145. This result was reported at a dilution of 1.
13	The surrogate 2-Fluorophenol for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 10 to 85. This result was reported at a dilution of 100.
14	The surrogate Phenol-d5 for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 7 to 56. This result was reported at a dilution of 100.
15	The surrogate Nitrobenzene-d5 for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 32 to 125. This result was reported at a dilution of 100.
16	The surrogate 2-Fluorobiphenyl for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 24 to 116. This result was reported at a dilution of 100.
17	The surrogate 2,4,6-Tribromophenol for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 23 to 131. This result was reported at a dilution of 100.
18	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 41 to 145. This result was reported at a dilution of 100.
19	The surrogate Terphenyl-d14 for method SW846 8270E was outside of control limits. The % Recovery was reported as 37 and the control limits were 41 to 145. This result was reported at a dilution of 1.

Alkalinity, Total	ALKT	BLK	ND	mg/L	5	ND

Method Blank 3922703 (MB) Created on 12/23/2024 16:17 For QC Batch 1359756

RESULTS

Compound	CAS No		Result	Units	RDL	Qualifiers
Alkalinity, Total	ALKT	BLK	ND	mg/L	5	ND

Method Blank 3922707 (MB) Created on 12/23/2024 16:17 For QC Batch 1359756

RESULTS

Compound	CAS No		Result	Units	RDL	Qualifiers
Alkalinity, Total	ALKT	BLK	ND	mg/L	5	ND

Method Blank 3922711 (MB) Created on 12/23/2024 16:17 For QC Batch 1359756

RESULTS

Compound	CAS No		Result	Units	RDL	Qualifiers
Alkalinity, Total	ALKT	BLK	ND	mg/L	5	ND

Method Blank 3922715 (MB) Created on 12/23/2024 16:17 For QC Batch 1359756

RESULTS

Compound	CAS No		Result	Units	RDL	Qualifiers
Alkalinity, Total	ALKT	BLK	ND	mg/L	5	ND

QUALITY CONTROL SAMPLES

WET CHEMISTRY (cont.)

Method Blank 3922719 (MB) Created on 12/23/2024 16:17 For QC Batch 1359756

RESULTS

Compound	CAS No		Result	Units	RDL	Qualifiers
Alkalinity, Total	ALKT	BLK	ND	mg/L	5	ND

Method Blank 3922723 (MB) Created on 12/23/2024 16:17 For QC Batch 1359756

RESULTS

Compound	CAS No		Result	Units	RDL	Qualifiers
Alkalinity, Total	ALKT	BLK	ND	mg/L	5	ND

Method Blank 3922727 (MB) Created on 12/23/2024 16:17 For QC Batch 1359756

RESULTS

Compound	CAS No		Result	Units	RDL	Qualifiers
Alkalinity, Total	ALKT	BLK	ND	mg/L	5	ND

Method Blank 3922731 (MB) Created on 12/23/2024 16:17 For QC Batch 1359756

RESULTS

Compound	CAS No		Result	Units	RDL	Qualifiers
Alkalinity, Total	ALKT	BLK	ND	mg/L	5	ND

Analytical Results Report For

Michael Baker International

Project Erie Coke Works 188511-3020
Workorder 3392316
Report ID 380461 on 1/9/2025

Certificate of Analysis

Enclosed are the analytical results for samples received by the laboratory on Dec 14, 2024.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Elizabeth Parker (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Global.

Reference

Notes

- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
- Except as qualified, Clean Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 136, including but not limited to the following EPA Method reference revisions:
  EPA 300.1 Rev. 1.0-1997
  EPA 300.0 Rev. 2.1-1993
  EPA 353.2 Rev. 2.0-1993
  EPA 410.4 Rev. 1.0-1993
  EPA 420.4 Rev. 1.0-1993
  EPA 365.1 Rev. 2.0-1993
  EPA 200.7 Rev. 4.4-1994
  EPA 200.8 Rev. 5.4-1994
  EPA 245.1 Rev. 3.0-1994
- Except as qualified, Safe Drinking Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 141.
- The Chain of Custody document is included as part of this report.
- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
- For microbiological analyses, the "Prepared" value is the date/time into the incubator and the "Analyzed" value is the date/time out the incubator.
- An Analysis-Prep Method Cross Reference Table is included after Analytical Results & Qualifiers section in this report.
- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND) above the MDL
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Practical Quantitation Limit for this Project
ND	Not Detected - indicates that the analyte was Not Detected
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits
#	Please reference the result in the Results Section for analyte-level flags.

Project Notations

Sample Notations

Lab ID	Sample ID		
3392316006	MW-9S	S1	This sample was analyzed at a dilution in the 8260 volatiles analysis due to matrix. Reporting limits were adjusted accordingly.

Result Notations

Notation Ref.	
1	The Total Acidity is titrated to a pH of 8.3 and reported as mg CaCO3/L.
2	The Total Alkalinity is titrated to a pH of 4.5 and reported as mg CaCO3/L.
3	The pH analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.
4	The QC sample type MS for method SW846 8260D was outside the control limits for the analyte Isopropylbenzene. The % Recovery was reported as 130 and the control limits were 73 to 129.
5	The QC sample type MSD for method EPA 300.0 was outside the control limits for the analyte Sulfate. The % Recovery was reported as 69.7 and the control limits were 80 to 120.
6	The QC sample type DUP for method SM2310B-2011 was outside the control limits for the analyte Acidity, Total. The RPD was reported as 20.2 and the upper control limit is 20.
7	The QC sample type MSD for method SW846 6010C was outside the control limits for the analyte Antimony, Dissolved. The % Recovery was reported as 49.6 and the control limits were 75 to 125.
8	The recovery of the Matrix Spike (MS) associated to this analyte was outside of the established control limits. The sample was post-digestion spiked, and this matrix spike was within acceptable recovery limits.
9	The QC sample type MS for method SW846 6010C was outside the control limits for the analyte Antimony, Dissolved. The % Recovery was reported as 52.8 and the control limits were 75 to 125.
10	The concentration of this analyte was greater than 4 times the concentration of the spike added to the matrix spike. According to protocol, the calculation for percent recovery of the matrix spike is not valid.
11	The surrogate 2-Fluorobiphenyl for method SW846 8270E was outside of control limits. The % Recovery was reported as 4.57 and the control limits were 24 to 116. This result was reported at a dilution of 1.
12	The QC sample type MS for method EPA 300.0 was outside the control limits for the analyte Sulfate. The % Recovery was reported as 61.3 and the control limits were 80 to 120.

Analytical Results Report For

Michael Baker International

Project Erie Coke 188511-3020
Workorder 3392812
Report ID 385520 on 2/4/2025 (Revised report. See Project Notations Section.)

Certificate of Analysis

Enclosed are the analytical results for samples received by the laboratory on Dec 18, 2024.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Elizabeth Parker (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Global.

Reference

Notes

- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
- Except as qualified, Clean Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 136, including but not limited to the following EPA Method reference revisions:
  EPA 300.1 Rev. 1.0-1997
  EPA 300.0 Rev. 2.1-1993
  EPA 353.2 Rev. 2.0-1993
  EPA 410.4 Rev. 1.0-1993
  EPA 420.4 Rev. 1.0-1993
  EPA 365.1 Rev. 2.0-1993
  EPA 200.7 Rev. 4.4-1994
  EPA 200.8 Rev. 5.4-1994
  EPA 245.1 Rev. 3.0-1994
- Except as qualified, Safe Drinking Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 141.
- The Chain of Custody document is included as part of this report.
- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
- For microbiological analyses, the "Prepared" value is the date/time into the incubator and the "Analyzed" value is the date/time out the incubator.
- An Analysis-Prep Method Cross Reference Table is included after Analytical Results & Qualifiers section in this report.
- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND) above the MDL
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Practical Quantitation Limit for this Project
ND	Not Detected - indicates that the analyte was Not Detected
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits
#	Please reference the result in the Results Section for analyte-level flags.

Project Notations

P1 This report was revised to include Selenium results for ALS#3392812001. EXP 2/4/25

Sample Notations

Lab ID	Sample ID		
3392812006	MW-42	**S1**	This sample was analyzed at a dilution in the 8260 volatiles analysis due to matrix. Reporting limits were adjusted accordingly.

Result Notations

Notation Ref.	
E	Result reported exceeds instrument calibration
1	Chloroethane was recovered above the 20 percent 8260D criteria in the continuing calibration verification associated with this sample. The % drift/difference was reported at 24.51%. Acceptable limits are +/-20%.
2	The QC sample type LCS for method SW846 8270E was outside the control limits for the analyte N-Nitroso-di-n-propylamine. The % Recovery was reported as 0 and the control limits were 46 to 133.
3	The Total Acidity is titrated to a pH of 8.3 and reported as mg CaCO3/L.
4	The Total Alkalinity is titrated to a pH of 4.5 and reported as mg CaCO3/L.
5	The pH analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.
6	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte 2,3,4,6-Tetrachlorophenol. The % Recovery was reported as 131 and the control limits were 80 to 120.
7	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte 2,4-Dinitrophenol. The % Recovery was reported as 71 and the control limits were 80 to 120.
8	The QC sample type LCS for method SW846 8260D was outside the control limits for the analyte Methyl acetate. The % Recovery was reported as 135 and the control limits were 70 to 130.
9	The QC sample type MS for method EPA 300.0 was outside the control limits for the analyte Chloride. The % Recovery was reported as 122 and the control limits were 80 to 120.
10	The QC sample type MS for method EPA 300.0 was outside the control limits for the analyte Sulfate. The % Recovery was reported as 126 and the control limits were 80 to 120.
11	The QC sample type MSD for method EPA 300.0 was outside the control limits for the analyte Sulfate. The % Recovery was reported as 122 and the control limits were 80 to 120.

Analytical Results Report For

Michael Baker International

Project Erie Coke Works 188511-3020
Workorder 3393066
Report ID 380554 on 1/10/2025

Certificate of Analysis

Enclosed are the analytical results for samples received by the laboratory on Dec 19, 2024.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Elizabeth Parker (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Global.

Reference

Notes

- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
- Except as qualified, Clean Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 136, including but not limited to the following EPA Method reference revisions:
  EPA 300.1 Rev. 1.0-1997
  EPA 300.0 Rev. 2.1-1993
  EPA 353.2 Rev. 2.0-1993
  EPA 410.4 Rev. 1.0-1993
  EPA 420.4 Rev. 1.0-1993
  EPA 365.1 Rev. 2.0-1993
  EPA 200.7 Rev. 4.4-1994
  EPA 200.8 Rev. 5.4-1994
  EPA 245.1 Rev. 3.0-1994
- Except as qualified, Safe Drinking Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 141.
- The Chain of Custody document is included as part of this report.
- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
- For microbiological analyses, the "Prepared" value is the date/time into the incubator and the "Analyzed" value is the date/time out the incubator.
- An Analysis-Prep Method Cross Reference Table is included after Analytical Results & Qualifiers section in this report.
- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND) above the MDL
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Practical Quantitation Limit for this Project
ND	Not Detected - indicates that the analyte was Not Detected
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits
#	Please reference the result in the Results Section for analyte-level flags.

Project Notations

Sample Notations

Lab ID	Sample ID

Result Notations

Notation Ref.	
1	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte 2,4-Dinitrophenol. The % Recovery was reported as 71 and the control limits were 80 to 120.
2	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte 2,3,4,6-Tetrachlorophenol. The % Recovery was reported as 131 and the control limits were 80 to 120.
3	The Total Acidity is titrated to a pH of 8.3 and reported as mg CaCO3/L.
4	The Total Alkalinity is titrated to a pH of 4.5 and reported as mg CaCO3/L.
5	Analyte was analyzed past the 28 day holding time.
6	The pH analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.

Analytical Results Report For

Michael Baker International

Project Erie Coke 188511-3020
Workorder 3391171
Report ID 372621 on 12/10/2024

Certificate of Analysis

Enclosed are the analytical results for samples received by the laboratory on Nov 22, 2024.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Elizabeth Parker (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Global.

Reference

Notes

- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
- Except as qualified, Clean Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 136, including but not limited to the following EPA Method reference revisions:
  EPA 300.1 Rev. 1.0-1997
  EPA 300.0 Rev. 2.1-1993
  EPA 353.2 Rev. 2.0-1993
  EPA 410.4 Rev. 1.0-1993
  EPA 420.4 Rev. 1.0-1993
  EPA 365.1 Rev. 2.0-1993
  EPA 200.7 Rev. 4.4-1994
  EPA 200.8 Rev. 5.4-1994
  EPA 245.1 Rev. 3.0-1994
- Except as qualified, Safe Drinking Water Act sample analyses are consistent with methodology requirements in 40 CFR Part 141.
- The Chain of Custody document is included as part of this report.
- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
- For microbiological analyses, the "Prepared" value is the date/time into the incubator and the "Analyzed" value is the date/time out the incubator.
- An Analysis-Prep Method Cross Reference Table is included after Analytical Results & Qualifiers section in this report.
- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND) above the MDL
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Practical Quantitation Limit for this Project
ND	Not Detected - indicates that the analyte was Not Detected
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits
#	Please reference the result in the Results Section for analyte-level flags.

Project Notations

Sample Notations

Lab ID	Sample ID		
3389099003	IDW-S	**S1**	The reporting limits for GCMS volatile analytes were raised due to the dilution of the sample caused by matrix.

Result Notations

Notation Ref.	
E	Result reported exceeds instrument calibration
1	The surrogate Phenol-d5 for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 35 to 111. This result was reported at a dilution of 100.
2	The surrogate Nitrobenzene-d5 for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 38 to 112. This result was reported at a dilution of 100.
3	The surrogate 2-Fluorobiphenyl for method SW846 8270E was outside of control limits. The % Recovery was reported as 0 and the control limits were 40 to 110. This result was reported at a dilution of 100.
4	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte Di-n-Octylphthalate. The % Recovery was reported as 79 and the control limits were 80 to 120.
5	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte Butylbenzylphthalate. The % Recovery was reported as 78 and the control limits were 80 to 120.
6	The QC sample type CCV for method SW846 8270E was outside the control limits for the analyte Hexachlorocyclopentadiene. The % Recovery was reported as 77 and the control limits were 80 to 120.
7	The sample was analyzed at 21.0 C
8	The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.
9	According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)
10	ALS-Middletown does not hold PADEP NELAP accreditation for this analyte by this method of analysis.
11	The CCV recovery yielded -25.61%D (limits +/-20%D) for method SW846 8260D for the analyte Bromomethane.
12	The surrogate Decachlorobiphenyl for method SW846 8082A was outside of control limits in the associated matrix spike duplicate sample (MSD). The % Recovery was reported as 24.5 and the control limits were 30 to 140. This result was reported at a dilution of 1.
13	The surrogate Decachlorobiphenyl for method SW846 8082A was outside of control limits. The % Recovery was reported as 26.9 and the control limits were 30 to 140. This result was reported at a dilution of 1.
14	Sample did not flash up to 200 f.

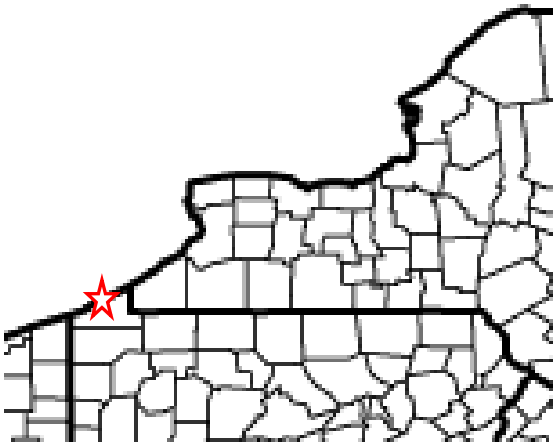
Army Corp. Erie Harbor CDF Fact Sheet

US Army Corps of Engineers ®

Great Lakes Navigation System

Erie Harbor, PA – Erie Harbor Confined Disposal Facility (Erie Harbor CDF)



Project Description

- Navigation Projects Served: Erie Harbor, PA.
- The facility is owned the Erie-Western Pennsylvania Port Authority.
- The facility is operated and maintained by the Buffalo District, U.S. Army Corps of Engineers
- Erie Harbor CDF is an in-lake facility attached to land in Erie, PA. The CDF is located on the south side of a bay formed by Presque Isle Peninsula.
- Erie Harbor CDF has an area of 23 acres and a total capacity of 420,000 cubic yards. Dredging quantities have historically amounted to approximately 100,000 cubic yards per dredging event, which occurs infrequently. However, only a limited amount of dredged material has been placed into the CDF over the years, with most of the dredged material placed in open lake. The CDF has less than 5 years of capacity remaining.
- In 2003, 8.3 acres of the CDF that had been completely filled was transferred to the Erie-Western Pennsylvania Port Authority (EWPPA) for operation and maintenance. The purpose of the transfer was to allow EWPPA to construct a public recreational campground and park on that portion of the CDF.
- Non-Federal interests may use this disposal facility if it is determined that the capacity to be used by the non-Federal interest will not reduce the availability of the disposal facility for Federal navigation project purposes, that the material is environmentally acceptable, and after payment of a tipping fee.

Project Authority

- The facility was constructed in 1979 under the authority of Section 123 of the River and Harbor Act of 1970, Public Law 91-611, as amended.

Beneficial Use Information

- Direct transportation access to the CDF is available via road and water.
- For more information about beneficial use opportunities, please contact the Corps of Engineers using the contact information at the bottom of this fact sheet.

Congressional Interest

- Representative Mike Kelly R-PA-16
- Senator John Fetterman D-PA
- Senator Robert P. Casey D-PA
