The Pennsylvania Department of Environmental Protection (DEP) strives to assist government officials, citizens, organizations, and businesses in understanding environmental issues and regulations. DEP is delegated authority to enforce many state and federal environmental laws and regulations and receives some federal funding allocations.

Regional Offices: DEP's six Regional Offices address environmental permitting, compliance, and appeals. Regional offices respond to environmental complaints and emergencies, engage with citizens and local groups, and provide regional information to legislators. Regional offices also conduct West Nile Virus control and Black Fly suppression programs.

Central Office: DEP's Central Office reviews and promulgates regulations, policies, and guidance documents; administers grants; and oversees issues like climate and energy, air modeling, meteorology, and certain permitting activities like dams and waste hauler authorizations.

Local, county and federal entities may have separate authorizations, regulations, and zoning. DEP works with these partners on various environmental issues. This is a sample of common issues outside of DEP's purview or where DEP shares oversight.

- mobile air sources
- indoor air quality
- on-lot sewage disposal systems
- certain waterways & wetlands permitting and compliance
- pretreatment for non-sewage discharges
- flood prevention and mitigation (including sewage backups)
- underground injection control well fluids
- pipeline construction and siting
- environmental stewardship projects, guidance, and programming
- The Allegheny County Health Department conducts sewage and waste inspections and associated minor enforcement matters, and has jurisdiction over the air quality program within the county
