**DIVISION OF MUNICIPAL and RESIDUAL WASTE**

**GENERAL PERMIT WMGR150**

**BENEFICIAL USE OF DEWATERED FRESHWATER DREDGED  
MATERIAL AS A SOIL ADDITIVE OR SOIL SUBSTITUTE FOR  
MINE RECLAMATION PROJECTS**

**Issued: December 22, 2025**

**Expires: December 22, 2035**

GENERAL PERMIT NO. WMGR150  
BENEFICIAL USE OF DEWATERED FRESHWATER DREDGED MATERIAL AS A  
SOIL ADDITIVE OR SOIL SUBSTITUTE FOR MINE RECLAMATION PROJECTS

**A. Description:**

The approval herein granted is limited to the beneficial use of dewatered freshwater dredged material, hereinafter referred to as “dredged material” as a soil additive or soil substitute for mine reclamation projects.

**B. Determination of Applicability Requirements:**

A person or municipality that proposes to operate under the terms and conditions of this general permit after the date of permit issuance must obtain a “Determination of Applicability” (“DOA”) from the appropriate Department Regional Office (see attached list) prior to commencing authorized activities under this general permit. A completed (i) General Information Form (Authorization Application for a Residual or Municipal Waste General Permit Application), (ii) Form B (Professional Certification), (iii) Form 20 (Application for a Municipal or Residual Waste General Permit), (iv) Form 27R (Acceptance of General Permit Conditions), and (vi) a DOA application fee in the amount identified in Section A (General Information) of the Form 20 must be submitted to the appropriate Department Regional Office. Application documents and payment should be submitted electronically to the Department. No activities shall commence unless approved, in writing, by the Department.

**C. Operating Conditions:**

1. Prior to the first beneficial use of dredged material, and every 10,000 cubic yards thereafter of dredged material from the same source, the dredged material may be beneficially used provided the chemical analysis for “Total” and “Leachable” levels of dredged material do not exceed the concentration limit, for any constituent, listed in Tables 1 through 5 below.
  - a. After the chemical analysis of dredged material, from a source, has been conducted at this frequency for five sampling events and the results are consistent and meet the concentration limit specified in Tables 1 through 5 in Condition C.1, the frequency of sampling may be reduced by the permittee provided that:
    - i. The permittee submits a written request for a reduction in sampling frequency to the Department, and
    - ii. The Department approves the request, in writing.

- \* Leachability evaluations shall be conducted on a representative sample conducted using the Toxicity Characteristic Leaching Procedure (EPA Method 1311) or the Synthetic Precipitation Leaching Procedure (EPA Method 1312). The maximum leachable concentration may also be calculated using the 20:1 rule (see EPA Method 1311) in lieu of performing TCLP or SPLP analysis. If the maximum leachable concentration is greater than the General Permit leachate criterion for a specific constituent(s), then TCLP or SPLP analysis shall be performed to determine actual leachate levels for those constituent(s).

The determination of compliance with Tables 1 through 5 may be based on the 90 percent upper confidence level for each constituent or the 80 percent confidence

GENERAL PERMIT NO. WMGR150  
BENEFICIAL USE OF DEWATERED FRESHWATER DREDGED MATERIAL AS A  
SOIL ADDITIVE OR SOIL SUBSTITUTE FOR MINE RECLAMATION PROJECTS

interval for pH using the Test Methods for Evaluating Solid Waste (EPA SW-846) as guidance for the statistical treatment of data.

2. The dredged material approved under this general permit is not authorized for the following activities:
  - a. The creation or restoration of a wetland, aquatic or island habitat unless an approval, a permit or other applicable requirement, if appropriate, under Section 401 of the Federal Water Pollution Control Act (33 U.S.C.A. §1341 (a)) and/or the Dam Safety and Encroachments Act (32 P.S. §§693.1 – 693.27) is obtained or met.
  - b. For residential use, sold, given away or otherwise distributed. After the chemical analyses of dredged material, from the same source, have been conducted for 15 to 20 sampling events and have met the concentration limits specified in Condition C.1 of the general permit, the Department may authorize dredged material to be sold, given away or distributed for beneficial use applications in residential areas if a written request for the beneficial use in residential areas is submitted by the permittee. A written approval from the Department must be obtained prior to commencing the beneficial use applications in residential areas.
3. The dredged material that does not meet the requirements as specified in Condition C.1 of this general permit shall be managed properly at a permitted disposal facility or may be beneficially used at locations outside the Commonwealth provided the dredged material is authorized for beneficial use by the State approving authority.
4. In compliance with the requirements specified in Condition C.1 of this general permit, the dredged material shall be monitored as follows:
  - a. The permittee shall collect representative samples of the dredged material and analyze for the total (mg/kg) and leachable (mg/L) levels for each constituent listed in Tables 1 through 5 of Condition C.1 of this general permit.

To obtain a representative sample of the dredge material, the samples must be taken from the correct locations and represent the entire amount of dredged material. In the batch process, more than one sample is usually necessary to accurately represent a particular batch of the dredged material or a storage pile of dredged material.

The key is to obtain a representative sample. In general, the more samples taken, the greater the chance that the sampling results will be representative of the dredged material and because the pollutant limits pertain to the quality of the dredged material that will be beneficially used, samples must be collected after the final stage of the dredged material generation process and prior to storage. Should knowledge of the dredged material, visual

GENERAL PERMIT NO. WMGR150  
BENEFICIAL USE OF DEWATERED FRESHWATER DREDGED MATERIAL AS A  
SOIL ADDITIVE OR SOIL SUBSTITUTE FOR MINE RECLAMATION PROJECTS

observations, or analytical results indicate variability in the quality of the dredged material, more frequent testing shall be conducted.

- b. For each new source of dredged material other than from the sources described in the application intended for beneficial use, the permittee shall submit an analysis of representative samples of the dredged material to the Department Regional Office (see attached list), by certified mail for all parameters listed in Tables 1 through 5 of Condition C.1 no less than 15 working days prior to acceptance and beneficial use of the dredged material. The permittee may beneficially use the dredged material in accordance with the conditions of this permit after the aforementioned fifteen-day period unless otherwise instructed by the Department.
5. All activities conducted under the authorization granted in this permit shall be conducted in accordance with the permittee's application. Except to the extent the permit states otherwise, the permittee shall utilize materials as described in the permit application.
  6. Persons processing, storing and/or using the dredged material for beneficial use purposes must comply with the following requirements:

**USE RESTRICTIONS:**

- a. The dredged material being used as an ingredient in roadway construction material shall not be used as a valley fill material; to fill open pits from coal mining; or to level an area or bring an area to grade where the roadway construction activity is not completed promptly after the placement of the dredged material. The dredged material is not to be used in any construction activity within 300 feet of a private or public water source.
- b. The dredged material may be used as stream bank stabilization or scour protection, as long as the dredged material is contained within or held in place by geosynthetic fabric, provided that an approval, a permit or any other applicable requirement, if appropriate, under Section 401 of the Federal Water Pollution Control Act (33 U.S.C.A. §1341 (a)) and/or the Dam Safety and Encroachments Act (32 P.S. §§693.1 – 693.27) is obtained or met.
- c. The dredged material shall not be used in the creation or restoration of a wetland, aquatic or island habitat unless an approval, a permit or other applicable requirement, if appropriate, under Section 401 of the Federal Water Pollution Control Act (33 U.S.C.A. §1341 (a)) and/or the Dam Safety and Encroachments Act (32 P.S. §§693.1 – 693.27) is obtained or met.
- d. The dredged material may not be beneficially used at a mine reclamation site unless the reclamation activity is permitted or otherwise authorized by the Department's Bureau of Mining Programs or Abandoned Mine Reclamation
- e. Best Management Practices shall be implemented to divert storm water run-on from the storage area. Runoff from the dredged material

GENERAL PERMIT NO. WMGR150  
BENEFICIAL USE OF DEWATERED FRESHWATER DREDGED MATERIAL AS A  
SOIL ADDITIVE OR SOIL SUBSTITUTE FOR MINE RECLAMATION PROJECTS

storage area(s) shall not cause surface water pollution or groundwater degradation and shall be managed in accordance with The Clean Streams Law and regulations promulgated thereunder. Prior to beginning operations at the facility, the operator must obtain all necessary storm water management permits.

- f. Upon cessation of operations or by the expiration date of this general permit or unless extended by the Department in writing, the permittee shall remove any remaining stored dredged material and any other residual wastes or other materials which contain or have been contaminated by the dredged material and shall provide for the processing, recycling, beneficial use, or disposal of the waste or material in accordance with the SWMA, the environmental protection acts and the regulations promulgated thereunder.
- g. Dredged material shall be stored as follows:
  - i. The dredged material must not be accumulated before being beneficially Used unless the operator shows that the dredged material is potentially reusable and has a feasible means of being beneficially used; and
  - ii. During two consecutive construction seasons (commencing on April 1), the amount of dredged material that is beneficially used equals at least 75% by weight or volume of the dredged material accumulated at the beginning of the period.
- 7. In Condition C.6 (Use Restrictions) of this general permit apply to all persons that propose to beneficially use the dredged material. The Conditions C.4 and C.5 also apply to: (1) any permittee who obtains a Determination of Applicability to conduct activities authorized by this permit, and (2) all subsequent end-users of the dredged material.
- 8. If the site for which this general permit applies has or is undergoing remediation pursuant to the Department's Land Recycling Program, the permittee is responsible to ensure that remedial actions on the property will not be adversely impacted by the construction authorized under this general permit. Remedial actions may have included the use of institutional and/or engineering controls to prevent exposure to or mitigation of contaminants which remain in soil and/or groundwater at the site. Any earth disturbance or development activities at the site must ensure that such engineering and institutional controls remain intact and effective.
- 9. The beneficial use of the waste as a soil amendment is contingent upon compliance with this permit and, if sold, the *Pennsylvania Fertilizer, Soil Conditioner and Plant Growth Substance Law* of the Pennsylvania Department of Agriculture. (Information relating to this law may be obtained from the Department of Agriculture by writing the *Bureau of Plant Industry, Division of Agronomic Services, 230 North Cameron Street, Harrisburg, PA 17110-9408.*)

GENERAL PERMIT NO. WMGR150  
BENEFICIAL USE OF DEWATERED FRESHWATER DREDGED MATERIAL AS A  
SOIL ADDITIVE OR SOIL SUBSTITUTE FOR MINE RECLAMATION PROJECTS

10. The permittee shall develop and implement a Preparedness, Prevention and Contingency Plan (PPC) that is consistent with the Department's most recent guidelines.
11. The permittee shall comply with the fugitive emissions regulations under 25 Pa. Code, Chapter 123 (relating to standards for contaminants) issued under the Air Pollution Control Act, the Act of January 8, 1960, P.L. 2119, 35 P.S. §4005, and shall comply with all the applicable provisions of 25 Pa. Code §§123.1, 123.2, and 123.31 (relating to prohibition of certain fugitive emissions and fugitive particulate matter).
12. Nothing in this permit shall be construed to supersede, amend, or authorize a violation of any of the provisions of any valid and applicable local law, ordinance, or regulation, providing that said local law, ordinance, or regulation is not preempted by the Solid Waste Management Act (SWMA), 35 P.S. §§ 6018.101—6018.1001; and the Municipal Waste Planning, Recycling and Waste Reduction Act of 1988, 53 P.S. §§4000.101, et seq.
13. As a condition of this general permit and of the permittee's authority to conduct the activities authorized by this general permit, the permittee hereby authorizes and consents to allow authorized employees or agents of the Department, without advance notice or search warrant, upon presentation of appropriate credentials and without delay, to have access to and inspect all areas on which solid waste management activities are being, will be, or have been conducted. This authorization and consent shall include consent to collect samples of waste, soils, water, or gases; take photographs; perform measurements, surveys, and other tests; inspect any monitoring equipment; inspect the methods of operation and inspect and/or copy documents, books, and papers required by the Department to be maintained. This permit condition is referenced in accordance with Sections 6018.608 and 6018.610(7) of the SWMA, 35 P.S. §§ 6018.608 and 6018.610(7). This condition in no way limits any other powers granted under the SWMA.
14. Any independent contractors or agents retained by the permittee in the completion of activities authorized under this general permit shall be subject to compliance history review by the Department prior to performance of any activities, as specified by the SWMA.
15. Failure of measures herein approved to perform as intended, or as designed, or in compliance with the applicable laws, rules, and regulations and terms and conditions of this permit, for any reason, shall be grounds for the revocation or suspension of the permittee's approval to operate under this permit.
16. The activities authorized by this general permit shall not harm or present a threat of harm to the health, safety, or welfare of the people or environment of this Commonwealth. The Department may modify, suspend, revoke, and reissue the authorization granted in this general permit if it deems necessary to

GENERAL PERMIT NO. WMGR150  
BENEFICIAL USE OF DEWATERED FRESHWATER DREDGED MATERIAL AS A  
SOIL ADDITIVE OR SOIL SUBSTITUTE FOR MINE RECLAMATION PROJECTS

prevent harm or the threat of harm to the public health, and the environment or if they cannot be adequately regulated under the conditions of this general permit.

17. The permittee shall comply with the terms and conditions of this general permit and with the environmental protection acts to the same extent as if the activities were covered by an individual permit. The Department may require an individual permit be obtained if the permittee cannot comply with the conditions of this general permit or is conducting an activity that harms or presents a threat of harm to the health, safety, or welfare of the public or the environment of this Commonwealth.
18. This permit does not authorize and shall not be construed as an approval to discharge any waste, wastewater, or runoff from the site of processing to the land or waters of the Commonwealth.
19. The permittee shall maintain in force and affect a general liability insurance policy in accordance with 25 Pa. Code, Chapter 287, Subchapter E (relating to bonding and insurance requirements) to provide continuous coverage during operation of the facility and until the Department issues a final closure certification.
20. Equipment used for the processing, storage and transportation of the dredged material shall be maintained in good operating condition. Weekly inspections of each storage area and its surrounding environments are to be conducted to determine stability, and for evidence of failure.
21. The processing, storage and transportation of dredged material shall be in a manner which does not create a nuisance or is harmful to the public health, safety or the environment and shall comply with the requirements of 25 Pa Code, Chapter 299 (relating to storage and transportation of residual waste).
22. Except for the waste approved for blending in Section A (Description) of this general permit, the dredged material shall not be mixed with other types of solid wastes, including hazardous waste, municipal waste, special handling waste, or other residual waste, as the terms are defined in 25 Pa. Code § 287.1, unless stated in writing by the Department.
23. Analytical testing required by this general permit shall be performed by a laboratory accredited under the Pennsylvania Environmental Laboratory Accreditation Act, Act of 2002, 27 Pa. C.S.A. §§ 4101-4113.

**D. Recordkeeping:**

1. The permittee shall maintain records of all analytical evaluations conducted in accordance with this permit, and records shall be made available to the Department upon request. Required records shall be retained for a minimum of 5 years. Records of analytical evaluations must include, at a minimum, the following for each sample: the dates of sampling and testing, sampling

GENERAL PERMIT NO. WMGR150  
BENEFICIAL USE OF DEWATERED FRESHWATER DREDGED MATERIAL AS A  
SOIL ADDITIVE OR SOIL SUBSTITUTE FOR MINE RECLAMATION PROJECTS

procedures utilized, name of the individual who collected the sample, the volume or weight of the sample, each parameter tested, the analytical results, the name of the analytical laboratory used, and the analytical methodologies employed.

2. The permittee shall maintain records of all waste accepted by the facility, and records shall be made available to the Department upon request. Required records shall be retained for a minimum of 5 years. Records of each source of incoming waste must include, at a minimum, the following: the name, address, and phone number of each source of incoming waste; the date of receipt; the quantity of waste received; the results of visual observations; and the name, address, and phone number of the destination of each outgoing shipment of waste. The permittee shall also maintain records of spills or releases that include, at a minimum, the following: the location, date, time, identification, and quantity of spilled or released material, and a description of how the material was cleaned up. The permittee shall also maintain records of all reports submitted to the Department or to the U.S. Environmental Protection Agency.
3. The permittee shall maintain records to demonstrate that dredged material from each source accepted for beneficial use meets the concentration limits listed in Tables 1 through 5 of Condition C.1 of this general permit.
4. The permittee shall maintain records of rejected, unacceptable and unauthorized wastes that are disposed from the facility. The records shall include the name and address of the disposal location, date of disposal, volume or weight of the waste that is disposed.
5. The records required in this condition shall be retained at the facility for a minimum of 5 years and made available to the Department upon request.

**E. Reporting Requirements:**

1. Any person that operates under the provisions of this permit shall immediately notify the Department via certified mail of any changes in: the company name, address, owners, operators, and/or responsible officials of the company; changes in land ownership or the right to beneficially use dredged material on land occupied; the physical or chemical characteristics of the dredged material; the processes which generate the dredged material; compliance status; and the change in status of any permit issued by the Department or federal government under the environmental protection acts.
2. Persons operating under the provision of this general permit shall submit to the appropriate Department Regional Office (see attached list), an annual report on the beneficial use activities conducted under this permit by March 1 for the preceding calendar year. This report shall include the information required by Conditions D.1. through D.5, and Section E.1 (Reporting Requirements)

GENERAL PERMIT NO. WMGR150  
BENEFICIAL USE OF DEWATERED FRESHWATER DREDGED MATERIAL AS A  
SOIL ADDITIVE OR SOIL SUBSTITUTE FOR MINE RECLAMATION PROJECTS

Condition 1, and to include: a summary of the weight or volume of the dredged material used for beneficial purposes during the last year, changes in location of beneficial use, and a “total” analysis (mg/kg) and “leachability” analysis (mg/L) of the dredged material for all parameters listed in Tables 1 through 5 of Condition C.1 of this general permit. This analysis data must be from representative sample(s) of the dredged material analyzed within the past twelve (12) months.

3. The permittee shall immediately notify the Department’s Emergency Hotline by telephone at 800-541-2050 and the waste management program in the appropriate DEP regional office (see attached list) of any accidental spills and shall take appropriate immediate action to protect the health and safety of the public and the environment.

**F. Renewal:**

A permittee that plans to continue the operations authorized under this general permit, after the expiration date indicated on the approval for coverage page, shall file a complete application for permit renewal at least 180 days before the expiration date of this general permit unless permission has been granted by the Department for submission at a later date. The renewal applications shall be submitted electronically to the appropriate DEP Regional Office (see attached list) and include, at a minimum, the following:

1. General Information Form (Authorization Application for a Residual or Municipal Waste General Permit Application),
2. Form B (Professional Certification),
3. Form 20 (Application for a Municipal or Residual Waste General Permit),
4. Form 27R (Acceptance of General Permit Conditions), and
5. Updated bonding worksheets, if applicable.

Additionally, a renewal application fee in the amount identified in Section A (General Information) of the Form 20 must be sent to the appropriate DEP Regional Office. This payment shall be submitted electronically along with the application.

In the event that a timely and complete application for renewal has been submitted and the Department is unable, through no fault of the permittee, to reissue the general permit or approval for coverage before its current coverage expiration date, the terms and conditions of the approved coverage will automatically continue and will remain fully effective and enforceable pending the issuance or denial of the renewal for permit coverage, provided the permittee is, and has been, operating in compliance with the terms and conditions of the general permit.
