

FIELD LOG –

Weeks of July 8 and July 15

Continue to implement the 2013 PROPOSED
SUSQUEHANNA RIVER SAMPLING PLAN:

- *Flows have decreased across the state to the point where sampling has continued in smaller tributary waters.*
- *Fish sampling was completed on smaller effluent-dominated tributaries in southeastern Pennsylvania, as well as most of the Juniata River tributaries.*
- *Fish and mussel sampling for the Susquehanna, Juniata, and Delaware rivers is scheduled to resume the week of July 22.*
- *Routine water quality transect data continues to be collected at established locations.*
