

WATER QUALITY MANAGEMENT PERMIT

<p>A. PERMITTEE (Name and Address): Homer City Generation LP 1750 Power Plant Road Homer City, PA 15748-8009</p>	<p>CLIENT ID#: 298406</p> <p>B. PROJECT/FACILITY (Name): Dixon Run Central Treatment Facility Sludge Disposal Boreholes</p>	
<p>C. LOCATION (Municipality, County): Cherryhill Township, Indiana County</p> <p style="text-align: right;">SITE ID#: 618057</p>		
<p>D. This permit approves the operation of additional industrial wastewater facilities consisting of:</p> <ul style="list-style-type: none"> • Sludge disposal boreholes including: <ul style="list-style-type: none"> ○ Existing borehole "B" (latitude/longitude: 40°36'31.8", -79°2'39.6") ○ Proposed borehole "C" ○ Proposed borehole "D" • The use of borehole "B" for the disposal of treatment plant sludge from the Dixon Run Central Treatment Facility is approved by this permit. • The use of boreholes "C" and/or "D" is subject to Special Condition C of this permit. 		
<p>Pump Stations: _____</p> <p>Design Capacity: _____ GPM</p>	<p>Manure Storage:</p> <p>Volume: _____ MG</p> <p>Freeboard: _____ inches</p>	<p>Industrial Wastewater Treatment Facility:</p> <p>Annual Average Flow: 0.36 MGD</p> <p>Design Hydraulic Capacity: 0.72 MGD</p> <p>Design Organic Capacity: _____ lb/day</p>
<p>E. APPROVAL GRANTED BY THIS PERMIT IS SUBJECT TO THE FOLLOWING:</p> <p>1. All construction, operations and procedures shall be in accordance with the Water Quality Management Permit application dated March 27, 2019, its supporting documentation and addendums, which are hereby made a part of this permit.</p> <p>Except for any herein approved modifications, all terms, conditions, supporting documentation and addendums approved under Water Quality Management Permit No. 3218200 dated August 7, 2018 shall remain in effect.</p> <p>2. Permit Conditions Relating to Industrial Wastewater are attached and made part of this permit.</p> <p>3. Special Conditions numbered A, B, and C are attached and made part of this permit.</p>		
<p>F. THE AUTHORITY GRANTED BY THIS PERMIT IS SUBJECT TO THE FOLLOWING FURTHER QUALIFICATIONS:</p> <p>1. If there is a conflict between the application or its supporting documents and amendments and the attached conditions, the attached conditions shall apply.</p> <p>2. Failure to comply with the rules and regulations of DEP or with the terms or conditions of this permit shall void the authority given to the permittee by the issuance of this permit.</p> <p>3. This permit is issued pursuant to the Clean Streams Law Act of June 22, 1937, P.L. 1987, as amended 35 P.S. §691.1 et seq. Issuance of this permit shall not relieve the permittee of any responsibility under any other law.</p>		
<p>PERMIT ISSUED:</p> <p>JULY 17, 2019</p>	<p>BY: <u></u></p> <p>TITLE: Christopher Kriley, P.E. Clean Water Program Manager Southwest Regional Office</p>	

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF CLEAN WATER

PERMIT CONDITIONS RELATING TO INDUSTRIAL WASTEWATER
For use in Water Quality Management Permits

(Check boxes that apply)

General

- 1. The Department of Environmental Protection (DEP) considers the licensed Professional Engineer whose seal is affixed to the design documents to be fully responsible for the adequacy of all aspects of the facility design.
- 2. All relevant and non-superseded conditions of any prior Water Quality Management Permits, decrees or orders issued to the permittee or his predecessor shall be continued in full force and effect and together with the provisions of this permit shall apply to his successors, lessees, heirs and assigns.
- 3. The responsibility for implementing the conditions of this permit shall rest upon the owner, lessee, assignee or other party in responsible managerial charge of the operation producing the wastewaters and waste treatment facilities. Transfer of a permit to a new owner shall not be effective until said transfer has been executed and filed on forms provided by DEP and DEP approved the transfer.
- 4. The permittee shall secure any necessary permission from the proper federal authority for any outfall or industrial waste treatment structure which discharges into or enters navigable waters and shall obtain a separate permit for any stream crossing, encroachment or change of natural stream conditions within the jurisdiction of DEP.
- 5. When construction of the approved facilities is completed and before they are placed in operation, the permittee shall notify DEP in writing so that a DEP representative may inspect the facilities.
- 6. The approval of the plans, and the authority granted in this permit, if not specifically extended, shall cease and be null and void 2 years from the issuance date of this permit unless construction or modification of the facilities covered by this permit has begun on or before the second anniversary of the permit date.
- 7. The authority granted by this permit is subject to all effluent requirements, monitoring requirements and other conditions as set forth in NPDES Permit No. **PA0235555** and all subsequent amendments and renewals. No discharge is authorized from these facilities unless approved by an NPDES Permit.
- 8. Nothing herein shall be construed to be an intent on the part of DEP to approve any present or future act by the permittee, inconsistent with the permittee's lawful powers or with existing laws of this Commonwealth regulating industrial wastes and the practice of professional engineering. This permit shall not be construed to sanction any act otherwise forbidden by any of the laws of the Commonwealth of Pennsylvania or of the United States.

Construction

- 9. This permit is issued under the authorization of The Clean Streams Law and 25 Pa. Code Chapter 91. The permittee shall obtain all necessary permits, approvals and/or registrations under 25 Pa. Code Chapters 102, 105 and 106 prior to commencing construction of the facilities authorized by this permit, as applicable. The permittee should contact the DEP office that issued this permit if there are any questions concerning the applicability of additional permits.
- 10. The facilities shall be constructed under expert engineering supervision and competent inspection, in accordance with plans, designs and other data as herein approved or amended and with the conditions of this permit.
- 11. A Pennsylvania licensed Professional Engineer shall certify that construction of the permitted facilities was completed in accordance with the application and design plans submitted to DEP, using the "Post Construction Certification" form (3800-PM-WSFR0179a). It is the permittee's responsibility to ensure that a Professional Engineer is on-site to provide the necessary oversight and/or inspections to certify the facilities. The certification must be submitted to DEP before the facility is placed in operation. As-built drawings, photographs (if available) and a description of all deviations from the application and design plans must be submitted to DEP within 30 days of certification.

- 12. The DEP office that issued this permit must be contacted during construction if significant changes are proposed to the approved facilities. Significant changes include, but are not limited to changes to the type(s) of process(es) used for treatment and changes to the design capacities of tanks, impoundments, and conveyance structures or equipment by more than 5% of the original design. For projects involving PENNVEST funding, all changes should be discussed with the DEP project manager prior to implementation. DEP may require the submission of an application to amend this permit. All changes shall be documented in an attachment to the Post Construction Certification form.
- 13. The local Waterways Conservation Officer of the Pennsylvania Fish and Boat Commission (PFBC) shall be notified when the construction of any stream crossing and/or outfall is started and completed. A written permit must be secured from the PFBC if the use of explosives in any waterways is required and the local Waterways Conservation Officer must be notified when explosives are to be used.

Operation and Maintenance

- 14. If at any time the industrial waste treatment facility, or the discharge of the effluent creates a public nuisance, or such discharge is causing or contributing to pollution of the waters of this Commonwealth, the permittee shall immediately adopt remedial measures acceptable to DEP.
- 15. The permittee shall maintain records of "as-built" plans showing all the treatment facilities as actually constructed together with facility operation and maintenance (O&M) manuals and any other relevant information that may be required. Upon request, the "as-built" plans and O&M manuals shall be filed with DEP.
- 16. To ensure operational efficiency and protect the waters of this Commonwealth, the permittee shall maintain skilled operators at all times.
- 17. No stormwater, sewage or other industrial wastes not specifically approved herein shall be admitted to the facilities for which this permit is issued.
- 18. These industrial waste treatment facilities shall be operated and maintained to perform as designed. In order to ensure the efficiency and proper maintenance of the treatment facilities, the permittee shall make periodic inspections to detect any impairment of structural stability, adequate capacity or other requisites which might impair the effectiveness of the approved facilities.
- 19. Collected screenings, slurries, sludge and other solids shall be handled and disposed of in compliance with Title 25 Pa. Code Chapters 287, 288, 291, 297 and 299 (related to permits and requirements for land filling, land application, incineration and storage of industrial sludge), Federal Regulations 40 CFR 257 and the Federal Clean Water Act and its amendments.

SPECIAL CONDITIONS

Water Quality Management Permit No. 3218200, Amendment No. 1

Homer City Generation LP

- A. The permittee shall notify the Bureau of Clean Water and the Mine Conservation Inspector from the Bureau of District Mining Operations at least ten days prior sealing any borehole associated with the Dixon Run Central Treatment Facility. Within ten (10) days of borehole sealing, a certificate of borehole/sealing procedure form must be submitted to the California District Office and the Mine Conservation Inspector.
- B. The Chestnut Ridge Mine entry area shall be monitored for mine water seepage once each month. The Bureau of Clean Water and the California District Mining Office shall be notified immediately if any seepage is observed.
- C. Sludge disposal boreholes "C" and "D" shall only be utilized in accordance with the approved sludge disposal plans specified below:

The sludge from the treatment of the mine water that is collected in pond A and pond B is removed by the use of a trash pump suspended in each pond. When activated, the pump sends sludge through a buried 6 or 4-inch line to the existing Borehole B into Chestnut Ridge #1 mine. In the event of a problem with the existing system, Borehole C, drilled into the Dixon Run #3 mine, will be used as an emergency backup. If Borehole C is utilized, permitting of Borehole D will begin immediately as a backup. If sludge is withdrawn at pumping Borehole A, Borehole C will be abandoned. If sludge material needs to be removed from the treatment ponds during the time that Borehole C is not in use and Borehole D location is being approved and installed, the sludge material will be disposed of at an approved refuse disposal site. The operation is monitored constantly by the plant operator during desludging procedures. The operator monitors the pressure on the discharge lines for any abnormal changes. If there is a change, the system will be shut down and the cause of the pressure change will be investigated with corrections made if necessary.

The permittee shall notify the Bureau of Clean Water, in writing, if circumstances at the site require the use of Borehole "C" or Borehole "D" pursuant to the sludge disposal plans described above.
