Internal Review and Recommendations

A draft permit was prepared on November 30, 2021 and published in the *Pennsylvania Bulletin* on December 18, 2021 for public comments for 30 days. No draft permit comments were received from the permittee or public.

The November 30, 2021 draft permit has effluent limits and monitoring requirements for IMP 101 expressed as "instream monitoring". This is a typographical error as they should be expressed as "internal monitoring points". This change will be made to the draft permit. All other requirements will remain the same as those specified in the November 30, 2021 draft permit.

As of the date of this fact sheet addendum, there is no open violation associated with this permittee or facility. It is recommended that the permit be issued with the minor change mentioned above.
