Authorization ID 1205034

Applicant and Facility Information

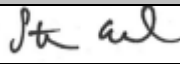

Applicant Name	<u>Ebensburg Borough Municipal Authority</u>	Facility Name	<u>Ebensburg Borough Municipal Authority WWTP</u>
Applicant Address	<u>300 West High Street</u> <u>Ebensburg, PA 15931-1582</u>	Facility Address	<u>291 Trout Lane</u> <u>Ebensburg, PA 15931-3815</u>
Applicant Contact	<u>Daniel Penatzer</u>	Facility Contact	<u>Same as Applicant</u>
Applicant Phone	<u>(814) 472-8780</u>	Facility Phone	<u>Same as Applicant</u>
Client ID	<u>62965</u>	Site ID	<u>246026</u>
SIC Code	<u>4952</u>	Municipality	<u>Cambria Township</u>
SIC Description	<u>Trans. & Utilities - Sewerage Systems</u>	County	<u>Cambria</u>
Date Published in PA Bulletin	<u>March 16, 2019</u>	EPA Waived?	<u>No</u>
Comment Period End Date	<u>April 15, 2019</u>	If No, Reason	<u>Major Facility</u>
Purpose of Application	<u>Application for a renewal of an NPDES permit for discharge of treated Sewage</u>		

Internal Review and Recommendations

In a letter dated April 2, 2019. The Ebensburg Borough Municipal Authority requested that the CSO elimination schedule be revised to reflect an elimination date of January 1, 2022. In an email dated April 21, 2021, Mr. Timothy Cooper, the consulting engineer, stated that to the best of his knowledge, the storm and wastewater sewers had been completely separated and that the final CSO had been abandoned. Therefore, the department will proceed with permit issuance without re-permitting Outfalls #002 and #003. The CSO condition and schedule has been removed from the previous draft permit. Any discharges from Outfalls #002 and #003 will need to meet the reporting requirements of Part A III. C.4 and Part B I. G 2, 3, and 4.

The EPA chose to perform a limited review based on the WET and CSO requirements. They commented that extending the compliance for elimination of Outfall #002 and #003 from September 1, 2017 to January 1, 2020 as proposed in the draft permit would represent a backsliding issue. This is because 40 CFR 122.44 (l)(1) requires that when a permit is renewed or reissued, interim effluent limitations, standards, and conditions must be at least as stringent as the final effluent limitations, standards, and conditions in the previous permit. At this time, the sewers have been completely separated and the final CSO abandoned. The department will proceed with permit issuance without re-permitting Outfalls #002 and #003.

The permit has been modified since the last draft to remove CSO #002 and #003 from Part A. Additionally, Part C has been revised to remove the CSO related condition and compliance schedule.
