Internal Review and Recommendations

Heidelberg Materials NE LLC (applicant) has submitted an amendment for permit transfer and name change from Highway Materials Inc. for their stormwater discharge associated with industrial activities to UNT Valley Creek (EV) through two outfalls (001 and 002).

The facility is involved in paving asphalt manufacturing.

DEP has conducted a site visit on 12/27/22. No violations or non-compliance issues noted.

Facility's stormwater is directed to two existing sedimentation basins. In earlier inspections it was observed and following noted.

" the basin for Outfall 002 was grassed over and any discharge infiltrated into groundwater. Since it receives limited runoff, it was decided that, although limits are specified in Part A, sampling is not required at Outfall 002."

As previously established monitoring is required at Outfall 001 for the parameters pH, TSS, O & G, Naphthalene, Trichloroethylene, and Benzene and will be proposed in draft permit as listed on page 4 of this factsheet.
