Applicant and Facility Information

Applicant Name	<u>Trans Fleet Concrete Inc.</u>	Facility Name	<u>Trans-Fleet Concrete Inc.</u>
Applicant Address	<u>PO Box 26483 101 1st Avenue</u> <u>Collegeville, PA 19426-0483</u>	Facility Address	<u>606 Jeffers Circle</u> <u>Exton, PA 19341</u>
Applicant Contact	<u>Danielle Kellon</u>	Facility Contact	<u>Marc Longacre</u>
Applicant Phone	<u>(610) 489-8884</u>	Facility Phone	<u>(610) 489-8884</u>
Client ID	<u>212368</u>	Site ID	<u>635095</u>
SIC Code	<u>3272</u>	Municipality	<u>West Whiteland Township</u>
SIC Description	<u>Manufacturing - Concrete Products, Nec</u>	County	<u>Chester</u>
Date Application Received	<u>January 29, 2025</u>	EPA Waived?	<u>Yes</u>
Date Application Accepted	<u></u>	If No, Reason	<u></u>
Purpose of Application	<u>Permit renewal.</u>		

Summary of Review

The Permittee requests approval for renewal of a NPDES permit to discharge stormwater runoff from the site of a ready-mix concrete batch plant located at 606 Jeffers Circle, Exton, PA, to an unnamed tributary to Valley Creek in the Brandywine Creek watershed.

The effluent limits for TSS and pH are continued from the existing permit. Monitoring requirements for Oil and Grease will also continue in the permit renewal. On page 22 of the NPDES permit there is a Part C condition on no. VII regarding "Requirements applicable to instream monitoring for pH." This requirement is for gathering pH data 50 feet upstream and downstream from the point where stormwater discharge enters the unnamed tributary. Sector-specific stormwater monitoring and BMPs requirements based on Appendix N (Glass, Clay, Cement, Concrete and Gypsum Products) of General Permit PAG-03 for discharge of stormwater associated with industrial activities are carried over from current permit. DEP revised sampling frequency from quarterly to semi-annual for all the parameters in minor amendment which is consistent with similar concrete facilities and will be carried over in this permit renewal. The facility is generally in compliance with effluent limits of NPDES permit.

The Trans Fleet Concrete – Exton Batch Plant is a Ready-mix concrete plant. Aggregate materials are stored in bins on southwest side of facility. Trucks are parked along eastern side of the facility. There are two concrete berms located at each entrance drive to divert stormwater to stormwater basin located in front of the facility which captures majority of stormwater from the facility. Trucks are loaded with concrete inside the building. A trench drain located outside of the loading area captures stormwater in this area. The water is pumped to process water tank. The truck wash-out pit is located next to the aggregate piles. The water is diverted to the process water tank. William Collins of Operations Section conducted site inspection on August 7, 2024 and had no concerns with the facility.

EPA issued the TMDL for nutrients and dissolved oxygen under low-flow conditions in the Christina River Basin for point sources, but stormwater runoff discharges were not included under low-flow conditions.

Summary of Review

Act 14 Notification – West Whiteland Township and Chester County – January 15, 2025

Draft permit is being issued contingent on completion of stormwater sampling for Total N, Total P, BOD5, and COD prior to Final Permit issuance.

Public Participation

DEP will publish notice of the receipt of the NPDES permit application and a tentative decision to issue the individual NPDES permit in the *Pennsylvania Bulletin* in accordance with 25 Pa. Code § 92a.82. Upon publication in the *Pennsylvania Bulletin*, DEP will accept written comments from interested persons for a 30-day period (which may be extended for one additional 15-day period at DEP's discretion), which will be considered in making a final decision on the application. Any person may request or petition for a public hearing with respect to the application. A public hearing may be held if DEP determines that there is significant public interest in holding a hearing. If a hearing is held, notice of the hearing will be published in the *Pennsylvania Bulletin* at least 30 days prior to the hearing and in at least one newspaper of general circulation within the geographical area of the discharge.

Discharge, Receiving Waters and Water Supply Information

Outfall No.	<u>001</u>	Design Flow (MGD)	<u>stormwater</u>
Latitude	<u>40° 0' 41.40"</u>	Longitude	<u>-75° 39' 14.59"</u>
Quad Name	<u></u>	Quad Code	<u></u>
Wastewater Description:	<u>Stormwater</u>		
Receiving Waters	<u>Unnamed Tributary to Valley Creek (CWF, MF)</u>	Stream Code	<u></u>
NHD Com ID	<u>26089460</u>	RMI	<u></u>
Watershed No.	<u>3-H</u>	Chapter 93 Class.	<u>CWF, MF</u>
Assessment Status	<u>Impaired</u>		
Cause(s) of Impairment	<u>FLOW REGIME MODIFICATION, SILTATION</u>		
Source(s) of Impairment	<u>URBAN RUNOFF/STORM SEWERS, URBAN RUNOFF/STORM SEWERS</u>		
TMDL Status	<u>Final</u>	Name	<u>Christina River Basin</u>

Changes Since Last Permit Issuance: None

Compliance History

DMR Data for Outfall 001 (from June 1, 2024 to May 31, 2025)

Parameter	MAY-25	APR-25	MAR-25	FEB-25	JAN-25	DEC-24	NOV-24	OCT-24	SEP-24	AUG-24	JUL-24	JUN-24
pH (S.U.) Downstream Monitoring Instantaneous Minimum						7.0						7.7
pH (S.U.) Instantaneous Minimum						7.6						8.0
pH (S.U.) Upstream Monitoring Instantaneous Minimum						7.7						7.7
pH (S.U.) Downstream Monitoring Instantaneous Maximum						7.0						7.7
pH (S.U.) Instantaneous Maximum						7.6						8.0
pH (S.U.) Upstream Monitoring Instantaneous Maximum						7.7						7.7
TSS (mg/L) Semi-Annual Average						27.9						9.2
TSS (mg/L) Instantaneous Maximum						27.9						9.2
Oil and Grease (mg/L) Semi-Annual Average						< 5.0						< 5
Oil and Grease (mg/L) Instantaneous Maximum						< 5.0						< 5

Proposed Effluent Limitations and Monitoring Requirements

The limitations and monitoring requirements specified below are proposed for the draft permit, and reflect the most stringent limitations amongst technology, water quality and BPJ. Instantaneous Maximum (IMAX) limits are determined using multipliers of 2 (conventional pollutants) or 2.5 (toxic pollutants). Sample frequencies and types are derived from the "NPDES Permit Writer's Manual" (386-0400-001), SOPs and/or BPJ.

Outfall 001, Effective Period: Permit Effective Date through Permit Expiration Date.

Parameter	Effluent Limitations						Monitoring Requirements	
	Mass Units (lbs/day) ⁽¹⁾		Concentrations (mg/L)				Minimum ⁽²⁾ Measurement Frequency	Required Sample Type
