Internal Review and Recommendations

Public notice was published in the PA Bulletin on September 21, 2019. No comments were received during the 30-day comment period.

One typographical error was discovered during final permit preparation: The minimum measurement frequency for Dissolved Oxygen has been updated from "1/week" to "1/day" in accordance with Table 6-3 of DEP's Technical Guidance for the Development and Specification of Effluent Limitations (doc. no. 362-0400-001). This requirement was cited in the draft permit fact sheet.

The Total Residual Chlorine IMAX limitation described in the original draft permit fact sheet, dated September 5, 2019, was mistakenly left out of the draft permit document. A second draft permit is being issued with another comment period based on the addition of the TRC limitation to the permit documents. The same open violations noted in the original draft permit fact sheet are still open.
