Project Description	<u>Renewal of an existing NPDES permit for discharge of treated sewage from a SRSTP</u>		

Summary of Review

The applicant is requesting the renewal of an NPDES permit for a single residence sewage treatment plant (SRSTP) for a discharge of up to 0.0004 MGD of treated sewage into Niche Pond (Unnamed Tributary to Raymondskill Creek), a High Quality, Cold-Water Fishery, Migratory Fish (HQ – CWF, MF) receiving stream in State Water Plan watershed 1-D (Shohola – Bushkill Creeks).

As per the Department's current existing use list, the receiving stream does not have an existing use classification that is more protective than the designated use. This stream segment is not designated as a naturally reproducing trout stream as per PA Fish & Boat Commission. This discharge is not expected to affect public water supplies.

All limits and monitoring frequencies have been carried over from the previous permit.

A note has been added under the Part A effluent limitation table requiring at least one sample for Fecal Coliform to be taken between June 1 and August 31 each year.

The Annual Maintenance Report (AMR) that's to be issued with the final permit shall be used to record the monitoring results. Discharge Monitoring Reports (DMRs) will not be sent with the final permit.

The existing permit expired on April 30, 2020 and the application for renewal was received late on December 17, 2021. The application was also received incomplete.

A Water Management System Inspection query indicated that a Compliance Evaluation was performed on October 28, 2021.
