Internal Review and Recommendations

The permittee submitted comments in a letter dated October 8, 2019. The letter requested a two-year compliance schedule to allow time for design and construction of treatment units to meet the proposed total aluminum limits. DEP does not object to this request and has included total aluminum in the existing compliance schedule for total suspended solids at Part C.II.

No substantive comments were received from Operations, the public, or U.S. EPA.

Based on the revision to the compliance schedule it is recommended that the permit is redrafted and published in the PA Bulletin for an additional thirty-day commenting period.
