Applicant Address	11790 Punch Bowl Road	Facility Address	11682 Punch Bowl Road
	Mercersburg, PA 17236-9780		Mercersburg, PA 17236-8762
Applicant Contact	Barry Metcalfe	Facility Contact	Barry Metcalfe
Applicant Phone	(301) 991-2292	Facility Phone	(301) 991-2292
Client ID	363409	Site ID	849861
SIC Code	8800	Municipality	Montgomery Township
SIC Description	Private Households	County	Franklin
Date Application Received	June 8, 2021	WQM Required	Yes
Date Application Accepted	June 15, 2021	WQM App. No.	2821402
Project Description	New NPDES Permit.		

Summary of Review

This report supports the issuance of an NPDES permit for discharge of treated sewage from a new single residence sewage treatment plant (SRSTP) located in Montgomery Township, Franklin County. The WQM permit application is also received and the IRR has been prepared separately for the WQM permit.

Based on the review, it is recommended that the NPDES permit be drafted.

DEP will publish notice of the receipt of the NPDES permit application and a tentative decision to issue the individual NPDES permit in the *Pennsylvania Bulletin* in accordance with 25 Pa. Code § 92a.82. Upon publication in the *Pennsylvania Bulletin*, DEP will accept written comments from interested persons for a 30-day period (which may be extended for one additional 15-day period at DEP's discretion), which will be considered in making a final decision on the application. Any person may request or petition for a public hearing with respect to the application. A public hearing may be held if DEP determines that there is significant public interest in holding a hearing. If a hearing is held, notice of the hearing will be published in the *Pennsylvania Bulletin* at least 30 days prior to the hearing and in at least one newspaper of general circulation within the geographical area of the discharge.

Cause(s) of Impairment			
Source(s) of Impairment			
TMDL Status		Name	
Nearest Downstream Public Water Supply Intake	Hagerstown, MD		
PWS Waters	Potomac River	Flow at Intake (cfs)	
PWS RMI		Distance from Outfall (mi)	42

Drainage Area
The discharge will be to Unnamed Tributary of Licking Creek at RM 0.03. A drainage area upstream of the proposed discharge point is estimated to be 1.27 sq.mi. according to USGS StreamStats available at https://streamstats.usgs.gov/ss/.

Streamflow
USGS StreamStats produced a Q7-10 flow of 0.023 cfs at the point of discharge.

Licking Creek
25 Pa Code §93.9z classifies Licking Creek (as the entire basin) as Trout Stocking. Licking Creek also supports migratory fishes. No special protection water is therefore impacted by this discharge. No Class A Wild Trout Fishery is impacted by this discharge. Based on DEP's 2020 integrated water quality report, the discharge will be located in a stream segment with attaining uses.

Public Water Supply Intake
Based on eMapPA, the nearest downstream public water supply intake is located near Hagerstown MD on the Potomac River approximately 42 miles from the proposed discharge. Given the distance and nature, the proposed discharge is not expected to impact the water supply.

Compliance History	
Summary of DMRs:	This is a new NPDES permit; therefore, no AMR is available for review.
Summary of Inspections:	There is no open violation associated with this facility or permittee.

Treatment Facility Summary

The proposed treatment system will be located in Montgomery Township, Franklin County (11682 Punch Bowl Road, Mercersburg PA 17236). The proposed treatment system will serve a single residence (400 GPD) and will consist of a 1,300 gallon bio-film reactor tank including 450-gallon pretreatment chamber, 600-gallon extended aeration chamber, and 250-gallon bio-kinetic clarification chamber. The proposed system will also consist of a 620-gallon chlorine contact tank. The details of the proposed system are described in the Internal Review and Recommendation (IRR) report for the WQM permit application. The Official Act 537 Plan Revision was approved on April 13, 2021 (no. A3-289150438-3S).

Development of Effluent Limitations and Monitoring Requirements

The proposed effluent limitations and monitoring requirements are derived from DEP's Standard Operating Procedure (SOP) for New and Reissuance Small Flow Treatment Facility Individual NPDES Permit Applications (SOP No. BPNPSM-PMT-003).

On December 10, 20215, DEP classified the proposed system as an alternate on-lot sewage treatment system and required this system (if installed) to meet 10 mg/L CBOD5, and 10 mg/L TSS as monthly averages. (Alternate technology no. A2015-0028-0001).

Facilities that are designed based on a flow of less than 2,000 GPD or considered as SRSTPs are exempt from the Bay requirements. Accordingly, it is not necessary for the permittee to perform nutrient monitoring.

Proposed Effluent Limitations and Monitoring Requirements

The limitations and monitoring requirements specified below are proposed for the draft permit, and reflect the most stringent limitations amongst technology, water quality and BPJ. Instantaneous Maximum (IMAX) limits are determined using multipliers of 2 (conventional pollutants) or 2.5 (toxic pollutants). Sample frequencies and types are derived from the "NPDES Permit Writer's Manual" (362-0400-001), SOPs and/or BPJ.

Outfall 001, Effective Period: Permit Effective Date through Permit Expiration Date.

Parameter	Effluent Limitations						Monitoring Requirements	
	Mass Units (lbs/day)		Concentrations (mg/L)				Minimum Measurement Frequency	Required Sample Type
	Annual Average	Daily Maximum	Minimum	Annual Average	Daily Maximum	Instant. Maximum		
Flow (MGD)	Report	Report	XXX	XXX	XXX	XXX	1/year	Estimate
Total Residual Chlorine	XXX	XXX	XXX	Report Average Monthly	XXX	XXX	1/month	Grab
CBOD5	XXX	XXX	XXX	10	XXX	20	1/year	Grab
Total Suspended Solids	XXX	XXX	XXX	10	XXX	20	1/year	Grab
Fecal Coliform (No./100 ml)	XXX	XXX	XXX	200	XXX	XXX	1/year	Grab
