**Internal Review and Recommendations**

Harris Township has submitted an application to renew the existing NPDES permit for its MS4 system.

DEP has received Harris Township's PRP / TMDL Plan Final Report, dated September 30, 2025. The pollutant load reduction requirement was 48,412 lb/yr total suspended solids. Through four stream restoration projects and one infiltration BMP, Harris Township generated 80,000 lbs/yr of TSS load reduction. The projects consist of three joint BMPs with College Township (PAI134803); Houseville East, Houseville West, and Millbrook Marsh, the joint Duck Pond Channel Project shared between The Pennsylvania State University (PAI134807), Ferguson Township (PAI134805), College Township (PAI134803), and Harris Township, and the Willowbrook / Fasick Park Basin retrofit. Harris Township is subcontracted 10,000 lbs/yr TSS of College Township's 25,435 lbs/yr TSS allocation of the Duck Pond Channels total "balance".

DEP recommends that the renewed permit is drafted so that the permittee shall continue to maintain and implement all BMPs outlined in the existing PRP in full working order to continue to meet the achieved pollutant reductions.

DEP will publish notice of the receipt of the NPDES permit application and a tentative decision to issue the individual NPDES permit in the *Pennsylvania Bulletin* in accordance with 25 Pa. Code § 92a.82. Upon publication in the *Pennsylvania Bulletin*, DEP will accept written comments from interested persons for a 30-day period (which may be extended for one additional 15-day period at DEP's discretion), which will be considered in making a final decision on the application. Any person may request or petition for a public hearing with respect to the application. A public hearing may be held if DEP determines that there is significant public interest in holding a hearing. If a hearing is held, notice of the hearing will be published in the *Pennsylvania Bulletin* at least 30 days prior to the hearing and in at least one newspaper of general circulation within the geographical area of the discharge.
