Internal Review and Recommendations

College Township has submitted an application to renew the existing NPDES permit for its MS4 system.

DEP has received College Township's PRP / TMDL Plan Final Report, dated September 30, 2025. The pollutant load reduction requirement was 76,849 lbs/yr total suspended solids. Through four stream restoration projects, College Township generated 140,639 lbs/yr of TSS load reduction. The four projects consist of three joint BMPs with Harris Township (PAI134801); Houserville East, Houserville West, and Millbrook Marsh and the joint Duck Pond Channel project shared between The Pennsylvania State University (PAI134807), Ferguson Township (PAI134805), Harris Township (PAI134801), and College Township. College Township was allotted 35,435 lbs/yr TSS of the 115,000 lbs/yr Duck Pond Channel project's total "balance", of which the Township subcontracts 10,000 lbs/yr to Harris Township.

DEP recommends that the renewed permit is drafted so that the permittee shall continue to maintain and implement all BMPs outlined in the existing PRP in full working order to continue to meet the achieved pollutant reductions.

DEP will publish notice of the receipt of the NPDES permit application and a tentative decision to issue the individual NPDES permit in the *Pennsylvania Bulletin* in accordance with 25 Pa. Code § 92a.82. Upon publication in the *Pennsylvania Bulletin*, DEP will accept written comments from interested persons for a 30-day period (which may be extended for one additional 15-day period at DEP's discretion), which will be considered in making a final decision on the application. Any person may request or petition for a public hearing with respect to the application. A public hearing may be held if DEP determines that there is significant public interest in holding a hearing. If a hearing is held, notice of the hearing will be published in the *Pennsylvania Bulletin* at least 30 days prior to the hearing and in at least one newspaper of general circulation within the geographical area of the discharge.
